July 14, 1975

MEMORANDUM FOR Mr. Ronald Nessen

The President had his six-month physical examination early this morning here in the White House. I have found the President to be physically fit and the results of the laboratory tests and examination were completely normal. The President has kept his weight between 195-200 pounds and he has continued to follow his daily exercise program. In addition, the completion of the new White House swimming pool will provide him with short intervals for relaxation that can easily be fitted into his busy schedule. I am confident that the President will maintain his good health and that he will continue to stride forward in carrying out his arduous day-to-day schedule.

William M. Lukash, M.D.  
Rear Admiral, MC, USN  
Physician to the President

CHRONOLOGICAL RECORD OF MEDICAL CARE

DATE	SYMPTOMS, DIAGNOSIS, TREATMENT, TREATING ORGANIZATION (Sign each entry)
14 July 1975	<p>The President had his six-month physical this morning at 8:00 A.M. He had no complaints other than some recent stiffness in his left shoulder. There were no associated symptoms radiating down his left arm and this is suggested cervical strain perhaps related to the position while sleeping. He has maintained his weight at 197 pounds and continued his active exercise program. There has been no further instances of rectal bleeding and his knees have not swollen or resulted in any discomfort as he continues his knee therapy. The addition of the swimming pool will provide him relaxation and exercise. His blood pressure was 122/78, pulse of 56. There is no evidence of any irritation in his mouth or pharynx that could be related to his pipe smoking. Examination of the neck showed no muscle spasm and good mobility. The heart and lungs remain normal; both knees showed good strength and mobility without swelling. There is no crista or locking. The electrocardiogram was normal and routine blood count, SMA 6 and 12, urinalysis were all normal with a fasting blood sugar of 108, a cholesterol of 257 and a uric acid of 7.4. There were no recommendations that he change his living pattern, but if he continues to have discomfort in his neck I might consider some intermittent cervical traction.</p>
