**FEDERAL PERSONAL DATA SYSTEMS
SUBJECT TO
THE PRIVACY ACT OF 1974**

**FIRST ANNUAL REPORT
OF THE PRESIDENT**

FOR CALENDAR YEAR 1975

Volume 2

Inventory of Federal Personal Data Systems

The Inventory of Federal Personal Data Systems is a listing of 6,723 systems of records subject to the Privacy Act for which notices were filed with the Federal Register on or before December 31, 1975 by 85 separate agencies. 1/

The inventory was established to--

- Compile the information required by the Privacy Act (at 5 U.S.C. 552a(p)) to be included in the annual report to the Congress.
- Assist the Office of Management and Budget in discharging its responsibilities under the Act to "provide continuing...oversight of the implementation of [5 U.S.C. 552a] by agencies."

The listing shows, for each system--

- The system name.
- The system number - an identifier assigned by OMB which consists of the organization codes used in the Budget of the United States Government for Fiscal Year 1977 and a unique sequential number assigned to each system.
- A number or code assigned by the agency for its administrative purposes.
- The date and page number of the latest 1975 notice of the system in the Federal Register.
- A code indicating whether the system is automated, manual, or a hybrid system which includes both automated and manual records.
- A code indicating the purpose of the system as either
 - an administrative system - dealing with the internal operation of government, such as personnel records, travel records, or parking permit records.

1/ In some cases agencies have determined that particular systems for which they published a notice are not systems of records subject to the Act (e.g., they contain no personal information). These systems are denoted with the letter "D" but remain in the inventory until a notice formally withdrawing them is published in the Federal Register.

- a domestic assistance program system - operated in support of a program listed in the 1975 Catalog of Federal Domestic Assistance. A Federal domestic assistance program is generally defined as a function of a Federal agency which provides assistance or benefits which can be requested or applied for by organizations or individual; or
- any other agency program system - pertaining to an agency's substantive program other than those included in the Catalog of Federal Domestic Assistance.
- A code indicating the type of activity supported by the system in terms of the governmental function served (e.g., agriculture, health, income security) as described in Part 5 of the Fiscal Year 1977 Budget of the United States Government. A list of budget function codes is appended to this volume.
- An estimate of the number of individuals on whom records are contained in the system. ^{2/} This number represents the agency's best estimate of the number of individuals about whom information is maintained rather than the number of pieces of information or files. For some systems, e.g., case files, there may be more than one file on an individual.
- Information on the extent to which agencies have claimed exemptions from certain provisions of the Act under subsections (j) and (k) of the Act including--
 - the provision(s) of the Act authorizing the exemption.
 - the number of individuals whose records fall within the exemption. ^{2/} If an exemption is authorized under more than one provision, the number of records exempted under each is shown. Since the same record may be subject to more than one exemption the sum of the number of records exempted may exceed the number of records in the system.
 - the date and page number in the Federal Register of the rule claiming the exemption.

^{2/} In a limited number of systems, the number of individuals is not permitted by law to be made public or is otherwise unavailable. Such systems are denoted with the letter "N". In other cases, the number of individuals was reported as zero either because they were not active records in an existing system or the system was not yet operational.
