CENTREX SWITCHBOARD FEATURES

The Centrex System is basically direct dialing to individuals rather than going through a switchboard operator. For efficient use of this system, PLEASE READ CAREFULLY:

INCOMING CALLS—
should be dialed directly to individual extensions which are listed on the following pages. So, when your telephone rings, it should be answered promptly—it will not be answered by the operator if you do not answer.

OUTGOING CALLS—
dial "9" and the desired number.

INTERNAL CALLS—
within the Centrex system—dial the last four digits of centrex number.

TO TRANSFER A CALL—
—Depress switchhook once,
—Listen for dial tone,
—Dial desired number,
—Announce call, hang up.

When the added number is busy or does not answer, depress the switchhook twice to restore original call. A call with a party outside your system may not be transferred to a number outside your system.

REMEMBER: Depressing the switchhook for longer than one second will cause disconnection.

LONG DISTANCE CALLS—
use the WATS lines when calling outside the state of Missouri. Dial 181 (wait for dial tone) then dial 1 + Area Code + Telephone Number.
