GENERAL DOMESTIC

## GASOLINE SUPPLIES AND PRICES

### Question

Will there be a shortage of gasoline this summer and are prices expected to go up again?

### Answer

Supplies of gasoline should be adequate to fulfill our needs throughout the summer months.

The price of gasoline has declined over the past few months principally because supplies are ample and competition good. However, the recent decline in gasoline prices will be reversed because of several factors:

- . First, as we move into the summer months, gasoline prices probably will rise as they normally do during this time of year.
- . Second, we are becoming more and more dependent upon higher priced foreign sources of crude oil.
- . Third, the Energy Policy and Conservation Act which became law last December will automatically increase domestic crude oil prices by about 75 cents per barrel in the coming year.

In total, gasoline prices may go up about 5 cents per gallon over the next few months and then decline somewhat during the winter months.

ENERGY INDEPENDENCE AUTHORITY (EIA)

Question

Whatever happened to the Energy Independence Authority? Do you still support it? And why is it better than letting private enterprise tackle the job?

Answer

The EIA which I proposed last October offers the potential for revitalizing our declining domestic energy production activities and thus helping us achieve our goals for energy self-sufficiency.

Most energy projects should and will be financed from conventional private sources, but other projects -- in selected areas such as synthetic fuels and electric utilities -- will require some direct Federal financing stimulus if we are to get the facilities built to increase domestic energy production.

Uncertainties -- such as long lead times before production, new technologies, and the future price of world oil -- make the private investor reluctant to commit capital to many such projects.

The EIA, as I proposed it, would support financially only those projects which would contribute directly and significantly to energy independence and which would not otherwise be financed by the private sector.

I support this proposal strongly and I am pleased that the Congress has begun hearings on it.

GRS  
5/8/76

Question

How can you claim to be for reducing Government regulations and the size of the Federal bureaucracy when you are letting the new Federal Energy Administration (FEA) muchroom in size?

Answer

Questions about the size and role of the Federal Government and its numerous agencies are a welcome sign. I hope the people that are paying the bills will continue to ask these questions.

The FEA was created in direct response to the Nation's demands for answers to our serious energy problems -- a problem that few recognized until the 1973 Arab Oil embargo.

The FEA has done a good job. The real test will be how well we control the growth of FEA and reduce the regulatory role in the months ahead.

The growth of FEA is dependent upon two key factors:

- . First, the allocation and price controls which were forced upon us by the 1973 Arab Oil Embargo.
- . Second, demands for the Federal Government to start new programs to promote energy conservation and encourage domestic energy production.

In the case of regulatory programs, we have learned once again that it's easier to start them than it is to end them. Despite my attempts to end controls that were started during the embargo, the Congress has insisted that we keep crude oil price controls for another 40 months and that we remove other controls very gradually. Last December, I promised to remove controls as fast as possible and we will do so. FEA is moving ahead aggressively on this job.

In other areas, FEA has been designated to carry out a number of entirely new programs which are designed to reduce the Nation's dependency on imported oil. These include the strategic petroleum storage program, coal conversion program, appliance energy labelling program and others required by the recent Energy Policy and Conservation Act.

In these areas, we will hold FEA employment to the levels that are necessary to carry out the new assignments.

## WHY DID YOU SIGN THE ENERGY POLICY AND CONSERVATION ACT

### Question

Governor Reagan has made clear that he thinks the energy bill you signed last December 22nd is bad for the country and will contribute to increased dependence on foreign oil. Why did you sign the bill when it runs counter to your previous position and is damaging to our domestic oil production?

### Answer

When I signed the Energy Policy and Conservation Act last December, I stated that the bill was by no means perfect. I also stated that I signed it because:

- . It did provide some of the authorities we needed, e.g., to set up a strategic petroleum storage program.
- . The oil pricing provisions did permit phasing out crude oil price controls over time (40 months).
- . It was the best bill we could get from the Congress.

I also stated that I intend to utilize fully the authorities granted to me to implement the pricing provisions in a way that would increase prices and stimulate added production, and to get the Government out of the price control business at the earliest possible time.

The bill provided a step in the right direction, but not as far as I would have liked. We have a long way to go.

## OIL COMPANY DIVESTITURE

### Question

There seems to be more and more talk in Congress about breaking up the major oil companies. You have said elsewhere, I believe, that you oppose the divestiture proposal. Why? And will you veto a divestiture bill if one comes to you from Congress?

### Answer

I am very concerned about the thrust of the divestiture bill recently approved by Senator Bayh's Subcommittee.

It assumes that, by breaking up a major segment of the oil industry, we can lower prices and increase secure supplies.

I have not seen any evidence to indicate that these results would occur.

If it could be positively shown that divestiture would improve the delivery of secure volumes of oil at lower prices to the American people, I would favor it.

The advocates of the bill reported by the subcommittee have not made that case. There is a good chance that the bill would retard rather than expand domestic production and actually increase our dependence on high priced foreign oil and our vulnerability to disruption from an embargo.

Until it can be demonstrated that divestiture legislation would improve rather than worsen our energy situation, I must oppose such proposals.

5/8/76

## MEXICO JOINING OPEC

### Question

What will be the effect on the use of Mexico's recent decision to join OPEC?

### Answer

We have known for some time that Mexico was considering joining OPEC. The effect of such a move over the long term is, of course, speculative. But, because of the fact that Mexico has kept its export prices in line with those of OPEC for some time now, I expect no appreciable changes in the prices of Mexican crude oil imported into the U.S.

5/8/76

WHAT HAPPENS TO OIL CONTROLS IF FEA IS DISBANDED ON JUNE 30

Question

Will the phased decontrol of crude oil and petroleum products continue if the Federal Energy Administration is disbanded on June 30?

Answer

First of all, I fully expect that FEA will be extended beyond the current statutory deadline of June 30 of this year. The FEA already had a number of important responsibilities (e.g., petroleum price and allocation controls) and more were added by the Energy Policy and Conservation Act in December of 1975 (e.g., strategic petroleum storage, energy conservation).

Legislation to extend the FEA is now before the Congress and I expect it to be favorably considered. In the unlikely event that FEA were not extended, its price and allocation programs would have to be carried out by another agency.

## OPEC OIL PRICE INCREASES

### Question

Do you think OPEC will raise the price of world oil again when the oil ministers meet in late May?

### Answer

Market conditions would certainly not warrant any further increase in oil prices. There is a little volume of unused production capacity in the OPEC countries and world demand for OPEC oil is still below the level of 1973. Moreover, there is some evidence that many of the OPEC countries are increasingly aware of their new responsibilities for the well being of the world economy and understand that any increase in oil prices would both jeopardize world recovery from recession and risk renewed world inflation. These considerations have been examined in the dialogue between oil consuming countries and oil producers in the Conference on International Economic Cooperation.

I hope that the OPEC nations will take account of all these factors and recognize that any increase in price would not be appropriate.

SOLAR ENERGY AND THE  
SOLAR ENERGY RESEARCH INSTITUTE (SERI)

Question

Why has ERDA scaled back its plans for the Solar Energy Research Institute (SERI)? Is this another signal that the Administration is going to slow down the development of solar energy -- while it continues to push nuclear?

Answer

First, let me point out that we are greatly increasing the Federal effort on solar energy. My 1977 Budget requests \$142 million for solar energy R&D -- an increase of 28 percent over 1976, and some 3-1/2 times over 1975.

Second, with respect to the proposed solar institute, ERDA did a thorough study to determine the best way to proceed. ERDA concluded that the Institute should begin with those functions that can now be specified as essential to the solar energy program. The Institute would then be expanded as the needs of the program dictate and the performance of the institute warrants.

## HUMPHREY-HAWKINS FULL EMPLOYMENT BILL

- Q. Why are you opposed to the Humphrey-Hawkins Bill?  
How do you plan to reduce unemployment?
- A. Let's discuss the real issue: do we want to create long term, well-paying jobs for anyone willing and able to work?

We do. But the Humphrey-Hawkins bill is a sham. Because despite the noble intentions behind it, it won't work.

First, it sets an unrealistic target of only three percent unemployment, a figure which covers only the people normally looking for jobs.

But even more important, it requires the government to adopt policies which are harmful to the long-term interests of the United States. It would not really help reduce unemployment. It would fuel further inflation. And it would hamper efforts to generate economic growth.

It is in short, a bad bill wrapped in a noble purpose.

What will create those jobs?

1. A strong economic recovery, achieved through the use of generalized monetary and fiscal policies. That is the tool we have been using. And that is the tool that is working.
2. Further economic growth to create jobs in private industry. We want to do that through controlling government spending and through providing firms with the incentives necessary to encourage them to invest in capital equipment which will provide additional jobs.

That is the real way to create jobs. And I hope the American people will not fall for the empty promises of bills like the Humphrey-Hawkins bill.

Inflation

- Q. At the beginning of the year you predicted an inflation rate of about 6 percent for 1976. In the first quarter, inflation was only 3.7 percent. Will you lower your prediction or do you expect the rate of inflation to increase during the remainder of 1976?
- A. The low inflation rate of only 3.7 percent in the first quarter was the result of falling farm and fuel prices. These declines were welcome, but we do not expect them to continue indefinitely. We are not changing our forecast at this time but will update it, as part of our normal mid-year Budget Review. It is possible that the excellent performance in the first quarter will result in an annual inflation rate under our 6 percent forecast.

May 8, 1976

## Wholesale Prices

- Q. The Wholesale Price Index rose 0.8 percent in April. Does this signal a rekindling of inflation?
- A. It is generally misleading to draw conclusions from a one-month change in an index. The April increase in the WPI by itself does not mean a resurgence in the inflation rate. The April rise in the WPI was primarily the result of a 4.2 percent rise in the farm products component of the index. This was responsible for reversing 5 months of stable wholesale prices. Industrial commodities rose only 0.3 percent, about the same as in recent months.

Preliminary indications for May are that the change in farm products prices is likely to be very small. Consequently, the change in the May index is likely to be less than the April change.

## Unemployment

Q. The unemployment rate in April was 7.5 percent, the same as March. Does this mean the rate of recovery is slowing?

A. It is misleading to draw conclusions from one month's index numbers. We will have to wait for a few more months, but I believe there are strong indications that the recovery is continuing on a firm basis.

The important point in the April figures is the increase in employment by 700,000 people. Employment is now 1.1 million higher than the prerecession peak.

The long duration unemployment rate (those unemployed 15 weeks or longer as a percent of the labor force) continued its monthly decline, falling by 0.2 percent to 2.2 percent.

May 8, 1976

## LABOR SETTLEMENTS

Q. What effect have recent labor settlements had on the economy? What do you foresee from the upcoming negotiations?

A. While some adjustments have been higher than we would like, by and large wage increases have been within a reasonable range. And with the exception of a three-day work stoppage by the Teamsters and the current strike in the rubber industry, the collective bargaining record for the first quarter of 1976 has been outstanding. The amount of work time lost because of disputes during that time was the lowest in more than a decade. Even in construction the number of strikes has been low.

This record is not based on a "peace at any price" philosophy. While there has been great publicity surrounding higher settlements, little attention has been paid to moderate settlements in the construction industry, in the needle trades, in the public sector and elsewhere. All of this reflects a lower rate of inflation and a growing confidence in the long-range stability of the economy's recovery.

I am hopeful that both management and labor in all industries will work hard to avoid work stoppages and to keep settlements reasonable -- for their best interests and for the best interests of the nation.

May 8, 1976

## BIG GOVERNMENT

Q. Mr. President, we hear alot of talk about big government and the need to reduce it. Could you tell us what, if anything, you are doing about this problem?

A. There is no doubt in my mind that government has extended itself too far into our economy, into our State and local governments, and into our personal lives.

My Administration has undertaken several efforts to reduce unnecessary federal intervention in these areas and to improve the management of essential federal activities.

I have offered legislative remedies to combat excessive regulations in the airline, trucking, and rail industries. I have instructed the regulatory and domestic agencies to reduce paper work and to reduce costly and unnecessary Administrative regulations and procedures.

I have also approved several activities currently in the planning stages that are aimed to improve the management practices and organization of the Executive Branch agencies and to reduce and clarify Administrative regulations that impose unnecessary "strings" on State and local governments.

All of these efforts add up to a significant movement on our part to reduce the presence of the Federal Government without undermining the essential responsibilities that it must assume.

FOREIGN AFFAIRS/  
DEFENSE

## KISSINGER AFRICAN TRIP AND U.S. POLICY

Q. During his trip to Africa, Secretary Kissinger made a variety of statements relating to the Byrd Amendment, U.S. policy on majority rule in Rhodesia, and other issues. Some political observers have suggested that his remarks were poorly timed and have hurt your campaign effort. Why did the Secretary choose the period just before the Texas primary to go to Africa, and do his statements reflect your views?

A. The Secretary of State is an appointee of mine. It is nonsense to question whether the policy he articulates is my policy. If it were not, he would not be Secretary of State in my administration.

But let me answer your real question: why are we concerned about Africa now?

In discussing Africa, we must realize that we are dealing with a new, and highly complex situation. The days of colonial jingoism have long past. The world has become increasingly inter-dependent.

Our interest in Africa is three-fold:

1. It is a massive continent, made up of a variety of nations and millions of people. We cannot ignore it strategically, politically, economically or morally.

2. It is a continent rich in natural resources. We need those resources for our economy, and the Africans need to sell those resources for their economy.

3. And, although our relations with most African nations are excellent, the Soviets are hovering in the wings, ready to sow dissention and turmoil and to work against the best interests of the people of both the United States and Africa.

My policy, therefore, is dedicated to improving and strengthening our relations with the people of Africa. I sent Secretary Kissinger to observe, to consult and to exchange views with African leaders so that he can provide me with first-hand information on how we might best proceed in formulating a new, integrated policy for Africa.

That policy of mutually beneficial relations with all the nations of Africa is our goal. It is in the best interests of all Americans and all Africans. And we intent to pursue it.

SECRETARY KISSINGER'S TRIP AND U.S.  
POLICY TOWARD AFRICA

Q: Mr. President, Secretary Kissinger made a variety of assertions during the course of his trip relating to the Byrd Amendment and to U.S. policy on majority rule in Rhodesia, among other issues. Some political observers suggest that his remarks have been poorly timed and have hurt your campaign effort. Was the Secretary speaking with your authority in Africa, and do his statements reflect the views you wish to convey internationally about your Africa policy at this time?

A: It is the goal of my Administration to improve and strengthen our relations with the nations of Africa. To that end, I sent Secretary Kissinger to Africa to observe, to consult, and to exchange views with African leaders so as to be able to provide me with first-hand information on how we might best proceed in formulating a new integrated policy for Africa.

All of his statements during the trip reflect my clearly and previously stated positions and we discussed the trip many times. His contacts and communications with African leaders reflect my desire to have our intentions with Africa understood, to listen to the needs and concerns of African leaders today, and to offer and to make clear where we stand on such issues as majority rule, minority rights, peaceful settlements, and economic development and that we are prepared to be helpful where we can in a spirit of cooperation.

Basically, Secretary Kissinger's trip has offered an opportunity for taking a major step toward accomplishing an Administration goal, a new and improved relationship with the Nations of Africa.

AID TO AFRICA

Q: In his speech Secretary Kissinger refers to such things as aid for refugees from Rhodesia, aid to countries like Mozambique and Zambia for closing their borders, and tripling our development programs in southern and central Africa over the next three years. Won't these programs have an adverse impact on your efforts to hold the budget?

A: Some of the assistance the Secretary refers to, such as the increase in funds for southern and central Africa, are manageable within projected budget plans. Other initiatives will come out of appropriations already received from Congress, but I expect that we will be looking at new proposals for future periods now that Secretary Kissinger has returned.

RHODESIAN CHROME

Q. Won't repeal of the Byrd Amendment cut off an important source of chrome and make the U. S. even more dependent on the Soviet Union for this vital material?

A. No, for the short term, the substantial inventory of chromite and ferrochrome held by US manufacturers, supplemented by imports from non-Rhodesian sources, will provide for our civilian and defense needs. Repeal of the Byrd Amendment would not mean increased dependency on the USSR for our chrome needs, however, even in the longer term. For high-grade chrome ore, there are several other major suppliers. For ferrochrome, our most significant chrome import from Rhodesia, we have 14 other supplies, not including the Soviet Union.

Further it should be noted that Rhodesia is not exactly a reliable source of chromium. Mozambique closed its border to Rhodesia in March, thus restricting its access to the sea. Rhodesia's remaining export transportation routes to South Africa are also insecure. If the Rhodesian chrome mines should be shut down or abandoned, it could require years to bring them back into service. By making every effort to

encourage the Smith regime to negotiate a settlement with the country's majority, we are, in fact, safeguarding our long-term access to Rhodesian chrome.

One further factor should be noted. By our failure to repeal the Byrd Amendment, we may risk our relationships with African states to the north of Rhodesia, with which we have substantial trade and investment ties. These countries are important sources of supply for us not only for petroleum, but also for such strategic materials as uranium, manganese, cobalt, tin, tungsten, and diamonds -- as well as for foodstuffs such as coffee and cocoa.

\* \* \* \* \*

May 11, 1976

SITUATION IN LEBANON

Q: What is the US doing to help bring peace and end the fighting in Lebanon? What do you think of the election of Elias Sarkis as the new President?

A: I am encouraged at the action of the Lebanese National Assembly to elect a new President in accordance with Constitutional procedures, an important first step toward the restoration of political normalization and stability.

Since the very outset of the crisis, we have been active in trying to help end the fighting and encourage a political solution. We have been in close consultations with the Lebanese Government, the various Lebanese groups involved in the dispute, the United Nations and other interested governments (Arabs, Israel and Western Europe) to seek practical solutions. I sent Ambassador Dean Brown to Beirut on March 31 to render all possible assistance to the parties involved.

Our government has been providing much needed humanitarian relief assistance and we are looking at ways in which we can continue to be helpful, given the magnitude of human suffering that has occurred in this crisis.

ARAB BOYCOTT

Q: What is your position on the Stevenson-Williams bill opposing the Arab boycott?

A: Last November 20, after an intensive Cabinet-level review of U.S. policy and practices in this field, I announced a series of measures for dealing with this complex problem in a manner consistent with our basic moral principles, our laws and our economic and foreign policy interests. These measures which are beginning to take effect will put an end to the possibility of foreign-inspired discrimination against Americans on the basis of race, religion, sex or national origin.

We are also continuing to work with interested foreign governments and American companies to see what more can be done about aspects of the boycott issue per se, which is not easily soluble through unilateral Congressional or Executive Branch actions. Until there has been more time to assess the results of the substantial actions already taken, we must be very careful about taking additional steps, particularly since the effect might be more harmful than helpful to our objectives of freer and greater trade.

May 11, 1976

## DURATION OF A PANAMA CANAL TREATY

Q: How can you speak of a 40-50 year term for a new treaty taking us well into the next century when the treaty negotiated with the Panamanians in 1967 provided for termination at the end of this century (25 years) and the Panamanians have publicly stated that any treaty extending beyond the end of the century would be totally unacceptable to them.

A: Obviously the United States is seeking a relatively long duration for a new treaty and the Panamanians are seeking a shorter term duration. This is one of the issues on which talks are continuing in the effort to reach agreement. But I believe it should be possible to find a formula that will be mutually acceptable and that will protect our interest in the operation and defense of the Canal as well as the basic interests of the Panamanian Government in the Canal.

Q: But do you believe we will get a treaty with a 40-50 year duration?

A: I do not want to comment further on the specifics of the negotiations which are still underway, but as I have emphasized I have no intention of approving or recommending to the Senate any treaty which does not protect our long term interests in the Canal.

DECLASSIFIED

E.O. 12958, Sec. 3.5

NSC Memo, 11/24/98, State Dept. Guidelines

By W. H. H., NARA, Date 11/30/00

~~SECRET~~

FYI: According to your instructions, our negotiators have now offered the Panamanians a treaty duration of twenty years for operations and forty years for defense. That would only take us to 1996 and 2016 respectively. This proposal has been rejected by the Panamanians. It is likely that if a treaty is possible it would provide for a termination date somewhere between these two for both defense and operation. The negotiations remain fluid and the greater flexibility we can preserve for ourselves the better.

~~SECRET~~

May 11, 1976

"USABLE LIFE" OF THE PANAMA CANAL

Q: You have referred to the "usable life" of the Panama Canal as being about 30 or 40 years. What do you mean by that? Do you mean to say that by the time the Panamanians assume full control of the Canal it will no longer be usable?

A: Of course the Canal will be of continuing importance and I do not mean to say that the Canal will no longer be in operation in thirty or forty or even fifty years. The economic and military importance of the Canal changes over time. The Canal is not as crucial to us as it was earlier in this Century. Advances in technology have expanded greatly the number of alternative modes of transportation and routes available to world trade. This has been one factor in the decline in traffic transiting the Canal. Many ships, both commercial and military, now are too large to transit the Canal and use other routes. Continuing advances will result in further broadening the number of economically competitive alternatives available. It is to this fact that I have referred in my comments on the subject.

(FYI: There is no indication that the usable life of the Canal will not extend well beyond the term of any treaty we might be able to sign with Panama.)

## PANAMA CANAL -- SOVEREIGNTY

Q: Your spokesman has said that the question of sovereignty over the Panama Canal is complex. The State Department says it is clear and that the U. S. does not have sovereignty. Would you comment on this difference?

A: President Eisenhower in 1959 recognized that "titular sovereignty" of the Canal Zone remains with Panama. This is, however, a complex legal subject because the United States has been granted by treaty all the rights that go with sovereignty. To say that the Canal Zone is the same as Alaska or the states carved from the Louisiana Purchase is simply not true. We were ceded those territories outright by the Russians and French which have retained no further interest in them. On the other hand, we have a continuing relationship with the Government of Panama to which we pay for the rights we exercise there. Our laws and our courts recognize the special status of the Canal Zone.

The sovereignty question, however, is not central to the basic issue of why we need a new treaty to best protect our national interest in access to the Canal.

May 11, 1976

POLITICAL SITUATION IN ITALY

Q: Mr. President, national elections are scheduled to be held in Italy on June 20. Some observers give the Communists a better than even chance of doing well enough at the polls to be invited to join the Italian cabinet. If this occurs, what will be the reaction of the U.S. Government, given your strong statements in the past opposing Communist participation in the Italian government?

A: The forthcoming election in Italy is, of course, an internal Italian matter. Decisions on domestic political affairs must ultimately be made by the Italian electorate. I would say, however, as I have said in the past, that a Communist government or coalition government including Communists in any NATO member state would raise serious questions about that country's role in the Atlantic Alliance. Communist participation in NATO governments would change the character of the Alliance. Past actions and statements by European Communists demonstrate that their influence in Allied Governments would seriously hamper Western defense efforts essential to Europe's freedom and to international stability. Communists in Western Europe have long advocated programs and values detrimental to NATO and to our mutual defense. It is the inevitable impact of such developments on the North Atlantic Alliance which is of concern to us.

Additionally, the commitment of the American people to defend European freedom would be deprived of the moral basis on which it has stood for 30 years.

May 11, 1976

SALT

Q: The SALT talks in Geneva have been recessed until June. Is this an indication that the talks are stalemated?

A: No the talks are in recess and will resume in early June. Meanwhile, we are continuing to work toward conclusion of a new SALT agreement. Our recent exchange of views has facilitated progress on some of the issues and provided further insight into the positions of both sides on the unresolved issues. In the coming weeks I will be conferring on next steps.

May 11, 1976

OPEC Oil Price Increases

Q: Do you think OPEC nations will raise the price of oil again when the oil ministers meet in late May?

A: Market conditions would certainly not warrant any further increase in oil prices. There remains considerable unused productive capacity in the OPEC countries, and world demand for OPEC oil is still below the level of 1973.

I am also encouraged by increasing evidence that many OPEC countries are aware that it is not in their interest to take any actions which threaten economic recovery in the industrialized nations or add further to the burdens of the non-oil producing developing countries. These considerations are being examined in the dialogue between oil consuming countries and oil producers in the Conference on International Economic Cooperation as well as at the UNCTAD meeting in Nairobi, and I am sure there is no misunderstanding of our willingness to join in discussing energy and other economic problems with the developing world.

## NAVY SHIPBUILDING PROGRAM

**Q:** In testimony before the Senate Armed Services Committee, Secretary Rumsfeld indicated that the Administration would like an additional \$1.2 billion for five new ships over and above your original FY 77 shipbuilding request. What has happened since you submitted your original budget in January to require an increase in the shipbuilding budget?

**A:** The five-year shipbuilding program that I submitted in January with my FY 77 Defense budget calls for construction of 111 ships over the next five years at a cost of \$35 billion. This program is based on our assessment that although the US Navy is still superior to the Soviets and capable of performing its essential missions, the trend in the overall maritime balance is moving against us -- and it is essential to reverse this trend. The five-year shipbuilding program I proposed does that. I made it clear at the time that we were conducting within the NSC system an intensive study of our future naval requirements, and that if this study indicated a need for further expansion of our program, I would not hesitate to seek the required funds from Congress.

The study has progressed far enough for me to conclude that additional funds for ship construction should be added to our FY 77 budget -- about \$1.2 billion for five more ships. The House recently acted to add roughly the same amount to the shipbuilding budget. I have added long-lead money for a new nuclear-powered aircraft carrier, but unlike the House program, mine favors

highly capable but conventionally-powered non-carrier surface ships rather than the more expensive nuclear-powered versions. In this way can we achieve an overall increase in the size of our fleet -- more quickly and more economically -- and this must be our top priority. I have also added money for research and development to exploit new technologies in ship design, weapons systems, and sensors.

My revised FY 77 shipbuilding budget meets the concern of the House and is worthy of the support of the whole Congress. To this end, I will work with Congress to ensure our continued ability to protect our vital interests on the high seas.

May 11, 1976

IMPORT COMPETITION

Q: The Trade Act of 1974 liberalized conditions under which US firms and workers can obtain relief from injurious import competition. Yet you have made a number of decisions in recent weeks which raise questions about your willingness to protect the American economy against overseas competition. Would you care to comment?

A: Our national interests are best served by an open world trading system which encourages the free flow of resources and products between nations. This principle which has guided US trade policy since the end of World War II offers the nation's strong export sector access to markets abroad, bringing this country the jobs and income through successful competition and lower prices to our consumers.

In some cases, however, an open trading system can cause dislocations in those sectors of the economy which are not able to adjust to international competition, and in those instances, we must help the injured parties without inviting foreign retaliation against the industries of our vigorous export sector.

In cases involving unfair foreign trade practices we must assure that trade is fair and equitable, and our anti-dumping and countervailing duty laws do just that. I will not allow foreign subsidies to force US workers and firms to compete against the national treasuries of our trading partners. On the other hand, we must be careful to avoid erecting unnecessary and undesirable barriers to trade, which stifle fair competition and invite discrimination against our exports. Neither

can we afford to ignore the impact of international trade on our workers and industries. The Trade Act outlines procedures for providing relief to adjusting industries -- remedies can take the form of increased customs duties, tariff rate quotas, orderly marketing arrangements, or adjustment assistance to workers and firms.

In recent weeks I have taken final action in a number of important escape clause cases. [\*] I decided each case on its merits, taking into account both the situation in the domestic industry and our broader trade interests. I will continue to follow this approach in dealing with future cases.

\*Optional: [I directed Ambassador Dent to negotiate orderly marketing arrangements with the principal foreign suppliers of specialty steel, directed the Secretaries of Commerce and Labor to expedite adjustment assistance to workers and firms in the footwear industry, allowed protection to lapse in the case of stainless steel flatware, and reduced or eliminated the special duty rates on certain ceramic tableware.]

May 11, 1976

U.S. POLICY ON NORMALIZING RELATIONS  
WITH VIETNAM

Q: You have been quoted as saying that under no circumstances will the U.S. recognize Vietnam. On the other hand, in December you said the United States is prepared to look to the future, implying that you would consider normalizing relations. Just what is your policy and has it changed from your statement in December?

A: Our policy is not changed. As I stated it in my Pacific Doctrine speech, we are prepared to look to the future and not the past in dealing with Vietnam, but our policy will be largely dictated by Vietnam's actions toward us and toward its neighbors.

Our major concern is to get an accounting for our men who never returned from Indochina. With the hope of making some progress in this effort, I authorized that a note be sent to the North Vietnamese stating our readiness to discuss a whole range of issues, but without an accounting for the missing men, there can be no real progress toward normalization. Under present circumstances, we have no plan to recognize Vietnam.

SECRETARY KISSINGER'S NAIROBI  
UNCTAD SPEECH

Q: What are your comments on the substantive proposals put forward by Secretary Kissinger at the UNCTAD meeting in Nairobi?

A: The speech reflected my belief in the need for increased multilateral effort in constructively approaching the problems of development consistent with the needs of both the developed and developing countries. It also raised a number of ideas such as the International Resources Bank, which the United States is proposing, and:

-- A comprehensive program to improve resource development and commodity trade, and to stabilize the export earnings of developing countries;

-- A far reaching long-term program to accelerate the transfer of technology to the developing countries through research and development and voluntary guidelines for international business;

-- Improved methods of meeting the balance of payments problems of individual developing countries, consistent with their economic strength and need; and

-- Special attention to the needs of the poorest countries.

These programs emphasize the reciprocal obligations of all countries in an interdependent global economy. We call on all nations to join with us for pursuit of solutions to these problems in our mutual interest.
