Attached is a chart made out by Frank C. P. McGlinn concerning the rate of unemployment in the state of Georgia compared to the national figures. It shows that at the start of the Carter term as Governor the unemployment rate for the state was substantially below the national rate, but that by the end of his term it was substantially above the national rate.

The source of these figures appears to be the Monthly Review published by the Research Department of the Federal Reserve of Atlanta.

The President may be able to make some use of these figures.

 FROM AGNES WALDRON *aw*
 SUBJECT UNEMPLOYMENT FIGURES IN GEORGIA

The attached list compares apples and oranges. The figures for Georgia are not seasonally adjusted but the U.S. figures are adjusted. I have written in red the correct unadjusted figures for Georgia and the U.S.

Verdict: No cigar.
