NOTICE TO THE PRESS

HOSPITAL BULLETIN NO. 11 -- 11:00 AM

Dr. William Fouty at the National Medical Center at Bethesda reports that Mrs. Ford had another excellent night, and was allowed to sleep late this morning. Mrs. Ford is steadily increasing her daily activities. She will be walking up and down steps today, and is expected to be up and about in the suite most of the day. She is able to spend more time on her mail.

Dr. Fouty says there are no problems in Mrs. Ford's recuperation. Her spirits and condition continue excellent.
