

AUGUST 20, 1975

Office of the White House Press Secretary
(Vail, Colorado)

NOTICE TO THE PRESS

President Ford is having dinner this evening at 7:30 p. m. at Ted Kindel's home. Guest list will be provided as soon as we obtain it. It is a small private party.

There will be a meeting tomorrow morning at 10:45 a. m. with Dr. Neil Jacoby, a former member of President Eisenhower's Council of Economic Advisors; a member of the Management Committee of Occidental Petroleum. He is coming to discuss with the President the insitu process used by the Occidental oil shale development. This is as opposed to the retort process which the President observed at Rifle. The insitu process leaves the shale underground, thereby eliminating the disposal problem in the retort process.

The President will be playing golf at 11:30 a. m. at the Vail Golf Course. The foursome includes: Governor Love, Ross Davis (a Denver businessman), Heath Larry, executive with U. S. Steel.
