

FOR IMMEDIATE RELEASE

OCTOBER 10, 1975

Office of the White House Press Secretary

THE WHITE HOUSE

TEXT OF LETTERS FROM THE PRESIDENT TO THE
SPEAKER OF THE HOUSE OF REPRESENTATIVES
AND THE PRESIDENT OF THE SENATE

OCTOBER 10, 1975

Dear Mr. Speaker: (Dear Mr. President:)

The Arab oil embargo of 1973 dramatically illustrated our ever-increasing dependence on foreign oil. Two years have passed since the embargo was imposed. But our vulnerability has increased. Nearly nine months ago I asked the Congress to adopt the Energy Independence Act of 1975. Prompt action on this proposal would have provided the statutory framework necessary to achieve energy independence by 1985. Enactment of this legislation remains as crucial now as it was in January. I urge the Congress to complete action promptly on those proposals.

It is estimated that the capital requirements for energy independence will total about \$600 billion over the next ten years. Risks are such in many of the projects necessary to develop domestic energy resources and reduce consumption that private capital markets will not provide necessary financing. The uncertainties associated with new technologies inhibit the flow of capital.

America cannot permit the excessive delays associated with the commercialization of unconventional energy technologies. New production is essential. Our national security and economic well-being depend on our ability to act decisively on energy.

Accordingly, I am herewith transmitting the Energy Independence Authority Act of 1975. This legislation would create a new partnership between the private sector and the Federal Government to assure action on vital energy projects in the next decade. The Federal financial assistance provided in this Act would be directed primarily toward the commercialization of those new technologies which offer the greatest promise to develop new supplies and conserve our present energy resources. The financing would be limited to those projects which would not be initiated without new Federal assistance. The EIA would be authorized to invest up to \$100 billion during a seven year period. It would terminate after ten years.

This legislation also addresses the need to simplify and expedite the increasingly complex process by which Federal regulatory decisions affect energy development. It provides for a more effective Federal licensing

more

process by authorizing a coordinated, single Federal application process and requiring Federal agencies to act promptly. The legislation would not alter the basic statutory responsibilities of Federal regulatory agencies.

The achievement of energy independence in the next decade requires a partnership of American business, labor, and government. Each partner must bear a fair share of the burden in the national interest.

The Energy Independence Authority Act of 1975 will give the United States the tools necessary to achieve energy independence. I urge its prompt enactment by the Congress.

Sincerely,

GERALD R. FORD
