

March 4, 1976

Office of the White House Press Secretary

---

NOTICE TO THE PRESS

In the text of the Federal Energy Administration's National Energy Outlook of 1976, there is a correction:

On page xxiii (23), the last sentence should read:

- Today, the United States spends about \$27 billion, or \$125 per person, for imported oil; as compared to about \$3 billion, or \$15 per person, in 1970.
