National Security Decision Memorandum 292

TO:           The Secretary of Defense

              Disarmament Agency  
              The Administrator, Energy Research and  
              Development Administration

SUBJECT:     U. S. - Iran Nuclear Cooperation

The President has reviewed the study directed by NSSM 219 and has noted the comments and recommendations of the agencies. The President has decided that in negotiating an Agreement on Cooperation in the Civil Uses of Atomic Energy with the Government of Iran, the U.S. shall:

- Permit U.S. material to be fabricated into fuel in Iran for use in its own reactors and for pass-through to third countries with whom we have Agreements.
- Agree to set the fuel ceiling at a level reflecting the approximate number of nuclear reactors planned for purchase from U.S. suppliers. We would, as a fallback, be prepared to increase the ceiling to cover Iran's full nuclear requirement under the proviso that the fuel represents Iran's entitlement from their proposed investment in an enrichment facility in the U.S. Any additional entitlement could be disposed of by Iran without importing the material into that country through sales from the United States to appropriate third countries with whom the U.S. has bilateral Agreements for Cooperation.
- Continue to require U.S. approval for reprocessing of U.S. supplied fuel, while indicating that the establishment of a multinational reprocessing plant would be an important factor favoring such approval. As a fallback, we could inform the Government of Iran that we shall be prepared to provide our approval for reprocessing of U.S. material in a multinational plant in Iran if the country supplying the reprocessing technology or equipment is a full and active participant in the plant,
