25	Mitch Kobelinski Max Friedersdorf	
26	Sen. Dole	
27	Sen. Dole	
29	Jesse Helms Susan Ford	

#### D. MAJOR POLITICAL RACES IN INDIANA

Republicans are expected to do well in Indiana this year. Strength at the top of the ticket may help carry the day for Congressional candidates in close races to recover seats lost in the 1974 election.

##### Governor

Incumbent Republican Otis Bowen faces Secretary of State Larry Conrad. Bowen has been a popular governor and has held the lead in this contest since the primaries. Dr. Bowen has been able to reduce local property taxes, although he has raised state sales tax. His political image is built around his experience as a small town doctor and former speaker of the Indiana House, while Conrad's strategy emphasizes his appeal to farmers and blue-collar workers. Only a rally of support for the straight Democratic ticket and a large turnout in urban areas could change the projected outcome enough to put Bowen out of office.

##### Senate

Republican Richard Lugar, the former mayor of Indianapolis, is well on his way to defeating three-term Senator Vance Hartke. The Democrats are apparently so sure of Hartke's impending defeat that they are redirecting their energies toward helping Jimmy Carter's Indiana campaign.

Lugar, perceived as honest, intelligent, and competent, has built a strong political base on his success as a mayor and as president of the National League of Cities.

Hartke has had close calls before, but even his well known drive and forceful campaigning are unlikely to reverse the tide toward Lugar whose personal style contrasts with Hartke's reputation in the state for support of special interests and high-living in Washington and abroad.

##### House of Representatives

1974 was a bad year for Republican congressmen in Indiana. Five incumbents lost their reelection campaigns in the backlash of Watergate.

This year should return the delegation to its pre-1974 status. Two seats are considered probably Republican wins and five others are possibilities. Of the remaining four districts, two are safe Republican slots and two are safe for incumbent Democrats.

The hotly contested districts are:

--1st District (Northwest--Gary): Robert Billings in a good organizer and may topple State Senator Adam Benjamin from his frontrunner status in this district. There is considerable difference of opinion about Billings' strength, but Republican Congressional Campaign Committee reports do not discount the possibility of an upset.

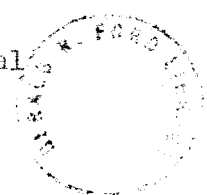

\* --2nd District (Northwest--Lafayette): Republican William Erwin has been making inroads against the incumbent Floyd Fithian's strength. Erwin worked with Earl Butz at Agriculture from 1973 to 1975 and ran well when he took on John Brademas in the third district in 1968. This district is traditionally Republican and is considered the best shot in the state for a Republican pickup.

--4th District (Northeast--Fort Wayne): J. Danforth Quayle has two things going for him as a Republican challenger--his personal wealth and his youthful zeal. The district has been traditionally Republican and incumbent Democrat J. Edward Roush has had several close calls in his past reelection efforts. The biggest threat to Quayle's challenge comes from Gail Gran (American Party) whose conservative votes will diminish Quayle's chances for an upset.

\* --6th District (Indianapolis suburbs): David Crane, the Republican challenger, is a top-quality candidate. His brother, Philip Crane of Illinois, is more conservative, but the family traits of good campaign organization and polished speechmaking are apparent in both brothers. Incumbent David Evans has some organizational problems in a Republican stronghold, but his incumbency is working in his favor. A Republican pickup here is probable.

--8th District (Southwest--Evansville): Belden Bell is a Republican conservative facing a Democrat, David Cornwell, who has geared his campaign to appeal to the conservative district. Bell's strength lies in the fact that he comes from the voter-heavy part of the district and has sufficient financial backing to mount a good campaign. Bell and Cornwell are both newcomers to campaigning for elected office, and the outcome of the race may be tied to presidential results in the district.

--10th District (East--Muncie): Incumbent Phil Sharp (D) has been attentive to constituent service. He is being challenged by an insurgent Republican candidate, William Frazier, who has solidified his position with regular Republicans since winning the primary. Frazier is wealthy and aggressive. He is an emotional campaigner who appeals to blue-collar and rural Democrats (former Wallace supporters) as well as traditional

Republicans. If Frazier mounts a last-minute media blitz on Sharp he could unseat him in the last days of the campaign.

--11th District (Central--Indianapolis): Lawrence Buell (R) has an outside chance to defeat incumbent Andy Jacobs. The main issue in the election appears to be Jacobs' marriage during his past term to fellow Ways and Means Committee member Martha Keys. (Both Jacobs and Keys are seeking re-election in their respective home districts.) Buell is highly respected as the treasurer of his county, but his support from the regular Republican organization has been sparse. Unless additional backing has been forthcoming, Jacobs will have little difficulty in winning on November 2.

\* = Probable Republican Win.

## E. PFC CAMPAIGN OVERVIEW

### Overview

There are slightly more than 2.9 million registered voters in Indiana, comprising approximately 81.6 percent of the total voting age population. There is no partisan registration in the state, however. Based on the last three Presidential elections, turnout of registered voters has averaged 73 percent and current projections according to PFC contacts is for a turnout slightly below this level.

Indiana can be broken down into three distinct political and geographic regions: North; Central; and South. Central Indiana was on the route of the old National Road, and many ancestors of the present day residents were among those in the great western migration. The voting pattern is generally Republican. Southern Indiana represents descendants of early settlers with southern loyalty in the Civil War, resulting in an overall preference for the Democratic Party. Northern Indiana was settled by Yankee migration from the northeast. While initially having a Republican orientation, later ethnic immigration turned Gary and South Bend into Democrat strongholds.

Although Indiana is composed of 92 counties, 61 percent of the Republican vote and 62 percent of the Democrat vote traditionally comes from the 20 largest counties. Historically, the Republican Presidential candidate carries the twenty largest counties by 100,000 votes. The target twenty counties in Indiana are:

Marion	LaPorte
Lake	Porter
Allen	Monroe
St. Joseph	Grant
Vanderburg	Howard
Madison	Wayne
Delaware	Clark
Elkhart	Johnson
Vigo	Bartholomew
Tippecanoe	Floyd

A direct mail effort is in progress which will deliver campaign literature to all identified Republicans and independents in the larger metropolitan centers. Also, the state PFC has sought and received endorsements from various citizen groups such as educators, doctors, Democrats, and farmers. In conjunction with this, there have been numerous efforts through the Heritage Groups to provide your clarification of your earlier statement on Eastern Europe.

The Indiana PFC is working very closely with the campaign staffs of Governor Otis Bowen and Senatorial hopeful Dick Lugar. Both candidates are extremely popular in Indiana, and are expected to do very well. Governor Bowen is serving as an active advocate for you as is Indianapolis Mayor William Hudnut.

A "Youth Caravan" program was launched two weeks ago. Young people have been organized to visit population centers of 15,000 persons or less on three consecutive weekends to "blitz" these areas with campaign literature and to provide local media coverage. Twenty separate "Caravans" will be out over the three week period. In addition, the full time youth coordinator is implementing an absentee ballot program for the many university students across the state.

With regard to the farm vote in Indiana, former Secretary of Agriculture Earl Butz continues to be very popular with Hoosiers and he is quietly, on his own, speaking to numerous farm groups throughout the state in your behalf.

Former United States Attorney Don Tabbert is heading up the Election Day Security Program in order to minimize vote fraud in such Democratic strongholds as Gary and Indianapolis. Tabbert's efforts at this task in 1974 received good recognition, and it is expected that his efforts this year will be equally effective.

#### RNC Phone Centers

Principal emphasis in the PFC organizational strategy is on selective voter turnout. Phone banks are the key tool in identifying your supporters and most centers were functioning as of September 15 with the remaining centers becoming operational by September 30. Marion County (Indianapolis) is the main focus of attention.

The calling program in the state has been severely behind schedule. Use of the 180 phone units located in the 19 RNC centers has been sub-par as only 6.3 percent of the projected 741,840 calls were completed as of October 22. A "Loan-A-Phone" program has been instituted to supplement the phone centers.

Advertising

The advertising effort in Indiana consists of a mix of network television, spot television and radio, newspapers and selected special voter group media.

Network advertising is made up of 5-minute films and 1-minute spots dealing with your Presidency, your family and your record in office. A series of "man-on-the-street" spots reinforcing positive impressions of you began running during network prime time.

Spot television features your conversations with workers and farmers, and the man-on-the-street package.

Spot television and radio began the week of October 18th.

## F. CARTER CAMPAIGN - INDIANA

Governor Carter has made three trips to Indiana with appearances in Indianapolis, Evansville and South Bend. He is said to be scheduled for a return visit October 28; the exact location and event are not known.

His Indianapolis remarks September 16 were devoted to refutation of the President's opening campaign remarks at Ann Arbor the previous night. He hit hard at unemployment, housing, interest rates, deficits and Medicaid scandals. He accused the President of lack of leadership saying, "I can't think of a single thing Mr. Ford has done in the last two years except to avoid another Watergate. He has brought a degree of integrity to the White House compared with Nixon. We ought to be able to expect of all our President that they be honest."

On September 28 Carter addressed an Evansville crowd of about 8,000 who had paid \$10 each to attend. He unleashed a harsh attack on the President who he described as being in the tradition of Harding, Hoover and Nixon. He said, "A Ford's a good automobile, but it's not doing too well in the White House. It's stuck in the mud, four flat tires, out of gas, gears locked in reverse. If it ever works again, which I doubt, I'm sure we're going to back into the future."

On October 9 Carter campaigned in South Bend and Indianapolis. While he toned down his remarks, he continued his assault on the President because of his remarks on Eastern Europe. He spoke at Notre Dame and taped a TV show with John Brademas. In his remarks he said, "I think that perhaps the expression of support in the Helsinki pact for making permanent the post World War II boundaries in Eastern Europe is a good move. It removes a threat the Soviet Union could hold over those countries, Poland and others, that they might change their boundaries. (Earlier Carter had said he would not have signed the Helsinki accord because it recognizes Soviet hegemony over Eastern Europe.)

Later he attended a rally in Indianapolis where he addressed a crowd of 8,000. Commenting on the second debate Carter said, "The most disgusting thing he (Ford) said to me was, there is no Soviet domination of Eastern Europe...I guess he just thought those tanks and troops belonged to Poland and not the Soviet Union."

He added, "I think there's just as much openness in the Ford Administration as there is freedom in Eastern Europe."

Keyed up by the crowd, he accused the President of hiding from the public "even more than Richard Nixon in the depths of Watergate." He also said, "Oh Ford doesn't worry about inflation...if I could live on \$5 a week, I wouldn't worry about it either."

Later at a fundraiser he complained bitterly about the Presidential Rose Garden campaign. He accused the President of being incompetent and secretive.

The Carter campaign strategy is to get out a big labor vote and a big black vote. However, the Democrats have a problem in that their candidates for governor and senator are considered to be drags on the ticket.

G. PUBLIC OPINION POLLS - INDIANA

Market Opinion Research in a poll conducted October 12-13 reported:

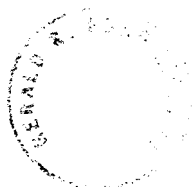

Ford	43%
Carter	42%
Undecided	15%

Unfortunately, the same poll shows Carter moving up. He gained 4 points while the President lost 3 points over a similar poll conducted in September.

INDIANA  
ISSUES GUIDANCE

## INDIANA ISSUES OVERVIEW

### GENERAL

#### (1) Economy

The economy is a good mix of heavy manufacturing and agribusiness, and both industries are doing relatively well. As of June the unemployment rate was only 5.1% statewide. Jobs and inflation are the major concerns of the voters.

#### (2) Agriculture

Indiana's farmers have just had one of their best years -- good crops, ample rain, near perfect harvest conditions. Corn prices are regarded as "not too bad". The farmers' concerns come down to the future direction of farm policy (Butz and your farm policy are well-like here), the ineptitude of OSHA and EPA, the question of grain reserves, and cattle industry problems.

#### (3) Government Spending

The State constitution requires a balanced budget, and most Hoosiers believe this sound fiscal policy should be practiced in Washington.

#### (4) Taxes

High taxes are the third most important issue to Hoosiers. In 1973 the Governor masterminded a bill that cut property taxes by at least 20% and, in counties that have adopted the local-option tax, by almost 40%. In addition, persons with incomes below a certain figure may deduct a portion of their property taxes from their income tax. Under this law, property owners have saved more than \$750 million in property tax payments. Offsetting this in part, the state sales tax was increased from 2% to 4%. Recent polls indicate that Hoosiers regard their State tax system as fair by a 2-to-1 margin.

#### (5) Crime

Indiana's citizens still rank crime as one of their main concerns. Local politicians believe William Hudnut's hard-line position on crime was a major reason for his election as mayor of Indianapolis. Recent press coverage of poor conditions in the State's prisons has focused attention on the entire criminal justice system.

(6) Concerns of One-Issue Voters

These concerns are abortion, gun control, and the Equal Rights Amendment (ERA). In general they should be avoided, even though your positions on all three would be compatible with the Indiana voter. ERA, which was defeated in the General Assembly, is supported by Senator Bayh, Governor Bowen, and former Mayor Lugar.

INDIANAPOLIS

Indianapolis, the capital of the state, is the nation's second largest city not located on navigable water.

(1) Inter-Belt Highway Loop

Thirty-one miles of new Interstate highway within the city were opened last Friday by Governor Bowen and Mayor Hudnut. This project, which the city is very proud of, was completed early through the efforts of the Governor and the full cooperation of the Federal government.

(2) Urban Homesteading, Neighborhood Revitalization, and City Development

Indianapolis is a pioneer in the Urban Homesteading Program under which HUD reposses property on default, passes title to the city, which in turn sells to owners at nominal costs under conditions requiring improvements utilizing private capital. By the time of your visit, the first 38 homes made available through this program will be occupied. Another 50 homes have just been announced by the Secretary of HUD.

The city is one of 11 cities selected by Small Business Administration for its Neighborhood Revitalization Program, whereby SBA supports a local development corporation. SBA Administrator Kobelinski announced this in Indianapolis on October 25.

The downtown area is vital and growing. In general, Indianapolis is a good example of what Republicans can achieve by setting up a working partnership between the Federal and local governments.

(3) Summer Youth Program

The Department of Labor complimented the City of Indianapolis for an outstanding Summer Youth Program, which involved over 1,900 youths this past summer.

(4) General Revenue Sharing

The Mayor and other local officials are extremely grateful for your efforts in behalf of revenue sharing, and are particularly pleased because it appears Indianapolis will receive approximately \$3 million per year more than anticipated when the city's budget was prepared. You should be aware that Representative Andy Jacobs (D-11th District) voted against revenue sharing.

(5) Crime

In the past year the crime rate for Indianapolis has dropped and it is now below the national average. This is primarily a result of improved internal management of the police force and a new neighborhood crime-watch program.

(6) Unemployment

The unemployment rate in the metropolitan area of Indianapolis was approximately 4.5% in September. Unemployment among young blacks in the inner-city, however, is around 40%.

(7) Busing

One-way busing has been in effect for some time, and a court order for two-way busing is now being challenged in the courts. Although busing is unpopular, the city's leadership is confident that the law will be obeyed peacefully.

INDIANA  
QUESTIONS & ANSWERS

ECONOMIC DEVELOPMENT IN INDIANAPOLIS AND INDIANA

Q. What is the Federal government doing about the economic development problems of Indianapolis and the State of Indiana?

A. Indianapolis has benefitted from many of the state-wide programs in Indiana financed by the Economic Development Administration.

In all, EDA has obligated \$28,273,205 since 1965 for projects to stimulate long-range economic growth in Indiana.

Most recently, it has approved a \$211,000 grant to the State of Indiana to conduct economic development planning. The program is directed from the Governor's office and seeks to uncover new resources which can attract industry.

The city also will share in the new growth resulting from loans made by EDA to businessmen in the state and from public works grants approved to provide facilities which will attract industry to the state.

PCL 10/21/76

(Indiana)

PUBLIC WORKS PROGRAM

- Q. How much can Indiana expect to get from the new Local Public Works Capital Development and Investment Program?
- A. Indiana and its cities and communities will receive a total of \$22,803,000. All cities may apply for 100% grants to construct public facilities, with priority going to those with unemployment above the national average. The Economic Development Administration began accepting applications for grants on October 26, and expects to process them within 45 days so that construction can get under way quickly.

Background

Under this \$2 billion program the basis for allocating funds to the states will be the actual number of unemployed workers and the state unemployment rate compared to the national rate. State allocations will range from a minimum of \$10 million to a maximum of \$250 million.

In approving individual project applications, first priority will be given to the projects that provide the largest number of jobs and that can be started immediately.

PCL  
10/21/76/AB

(Indiana)

MINORITY BUSINESS

- Q. In any adverse economic situation, it seems minority business is hardest hit. What are you doing about the problems that minority businesses face?
- A. We are seeing some very favorable trends for minority business in the United States. The minority financial community is strengthening -- more banks, more S-and-Is, more venture capital -- and the tight money problems historically experienced by minority business firms are easing. We expect minority business receipts to double between 1972 and 1977, from \$16 billion to \$32 billion. Then, by 1982, we expect them to have doubled again, from \$32 to \$67 billion.

The Office of Minority Business Enterprise in the Commerce Department and the Small Business Administration have strong programs to assist minority business, and I fully support these efforts.

In Indianapolis, 148 procurement contracts were awarded to minority business during 1976, with a total dollar value of \$8.2 million. Our minority business organizations also helped minority businesses prepare 33 loan packages in FY 1976, valued at \$2.3 million.

## HOG SITUATION

- Q. The number of hogs being produced is increasing. Does this mean that retail prices on pork will be falling? And what does it mean to farmers?
- A. It is clear that the hog cycle, in terms of numbers is on the upswing, but retail pork prices may not fall too much. That's because, while the amount of pork is increasing, so is the demand. In the third quarter of this year, almost 3 billion pounds of pork were produced, 15% more than in the third quarter a year ago. The average retail price per pound was \$1.38 compared to \$1.49 a year ago.

### Background

Farmers received an average of \$43.33 per hundred weight last quarter compared to \$56.20 a year earlier. There was a 21% increase in the number of hogs farrowed this summer, which means that the supply of pork probably will increase in 1977. Hog slaughter could be 18% above 1976 during the first half of 1977.

PCL  
10/22/76/AB

## CATTLE INDUSTRY

- Q. What are you doing to help the American livestock industry -- particularly the cattle industry -- recover from its current troubles?
- A. American agriculture and our livestock industry in particular are the envy of the world. It is critically important that these industries be kept strong so that our farmers and ranchers can continue to provide the food that America needs.

I am concerned that cattle feeders and the producers of calves have not shared equitably in the general farm income upsurge that has taken place since 1972. The swing upward in cattle numbers went too far -- indeed, it set a record -- and lasted too long. With the cycle now well past its peak and with cattle numbers continuing to decline, we should soon see a market recovery.

Within the past few weeks, I have:

- imposed quotas on meat imports,
- approved the much-needed packer-bonding legislation, and
- signed legislation extending the Emergency Livestock Credit Act through September 30, 1978.

In addition, I have asked the Department of Agriculture to increase its purchases of beef for the school-lunch program.

These actions should assist livestock producers, provide stability in the marketplace, and help to ensure an adequate supply of meat for the American consumer at reasonable prices.

PCL  
10/19/76/AB

## GRAIN RESERVES

Q. Why don't you tell Kissinger to forget about building up international grain reserves? They'd just depress market.

A. Republicans at Kansas City simply said: "We oppose government-controlled grain reserves..." I agree.

Some reserve guidelines are helpful for meeting unusual situations. The important thing is who controls those reserves. My position is that each nation should be free to control its own reserves. For us, that means the reserves will be carried by farmers and the private trade.

Reserves in the hands of government cost millions of dollars to store, require massive bureaucracy, lead to strict acreage controls and political manipulation, and depress prices to farmers. The United States ends up in the position of a residual supplier of global markets. We've had enough of that.

### Background

Mr. Carter and the Democratic Platform call for the creation of a predictable, stable, reasonably small grain reserve, with up to a two-month supply. Prominent groups like the Committee for Economic Development (CED) and the National Planning Committee have also suggested the need for government-held grain reserves.

In the past, large surplus grain stocks held in the US, Canada, and Australia served as the world's reserve system. Now those surpluses are gone and other countries -- the grain importing nations among them -- must help carry a larger share of the load.

Two principles now guide the United States on the issue of reserve stocks:

First, given the fact that the United States supplies more than half the grain moving in world trade, our market-oriented full-production policy makes an important contribution to world food security.

Second, It is up to each government to determine how to hold reserves. Given US reliance on market orientations, our grain reserves will be under private ownership.

PCL

10/20/76/AB

## AGRICULTURAL EXPORTS

- Q. The prosperity of American farms is tied closely to agricultural exports. Is there a danger that foreign countries will not want our agricultural production?
- A. I see little danger of this. In the first seven months of 1976, \$13 billion in agricultural products were exported, slightly ahead of the same period last year. With severe droughts having curtailed farm production in several European countries, their demand for US farm products has increased.

As for the long term, there is very, very little likelihood that we will have a surplus of US agricultural production as long as we keep open our exports to foreign countries. Our farmers, the most productive and efficient farmers in the world, can compete effectively in world markets.

Moreover, foreign markets should continue to grow. Our Long-Term Grain Supply Agreement with Russia alone ensures the sale of 6 million metric tons of US corn and wheat tons of US corn and wheat each year. And, many countries, unable to raise enough to feed their growing populations, need not only products from US farms but also need our advice and technological expertise. The world population will almost double by the turn of the century. The farmers of America and the world are going to be hard-pressed to keep up.

### Background

US agricultural exports are up 4% for the January-July period of 1976. Gains have occurred for all major commodities, except wheat, rice, cotton, vegetable oils, and dairy products.

During fiscal year 1976, US farmers:

- Sold the production of nearly one crop acre in three on global markets.
- Earned almost 25% of their cash receipts in the world market.
- Exported:
  - 55% of their wheat
  - 51% of their soybeans
  - 50% of their cowhides
  - 47% of their rice
  - 40% of their cotton
  - 25% of their feedgrains
  - 20% of their tobacco

PCL  
10/19/76/AB

### NEW FARM LEGISLATION

- Q. Where will you stand in the battle for new farm legislation next year?
- A. I propose to continue the present successful market-oriented policies. These policies give farmers the freedom to plant for growing markets at home and abroad, a freedom that has provided consumers with unsurpassed abundance and farmers with record incomes.

The old agriculture programs dating from the 1930s substituted government decisions for farmer and rancher decisions. Finally, in 1970, the US started to break away from controls. The results speak for themselves: Net farm income has moved up from \$14.2 billion six years ago to \$27.5 billion in FY 1976. Exports of US agricultural commodities have increased from \$6.7 billion in 1970 to about \$22 billion during the past year.

We need an extension of the type of legislation now in effect to ensure that farm prosperity continues. I will fight for this legislation since I do not want to see us step backward away from the free market agriculture that has brought record prosperity to farmers and new vitality to rural America over the past several years.

PCL  
10/19/76/AB

## FARM PRICE SUPPORT LEVELS

- Q. Some agricultural interests advocate setting farm price supports at least equal to the cost of production. At what level would you set target prices and farm price support loans if you had your way?
- A. I favor increasing protection levels somewhat because of rising farm operating costs, and I'll ask Congress to make some changes when it convenes in January.

As for target prices, they should be high enough to protect the farmer from heavy loss, and yet not so high as to stimulate over-production. During weak markets, adequate target prices encourage farmers to maintain production and to continue to produce a quality product.

As for loan levels, in early October, I directed the Secretary of Agriculture to use existing authority to increase the loan rate on wheat and feed grains so that farmers could hold these commodities off the market while waiting for a better time to sell. The higher loan rate will provide growers with more interim operating capital.

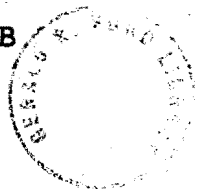

### Background

Under our market-oriented food policy, net farm income has averaged \$28.4 billion annually for the three-year 1973-1975 period, compared with only \$12.3 billion in 1968.

The old and new per bushel loan rates (national average) on wheat, feed grains, and soybeans are as follows:

	<u>Old</u>	<u>New</u> (10/13/76)
Wheat	\$1.50	\$2.25
Corn	1.25	1.50
Soybeans	2.50	2.50
Sorghum	1.19	1.43
Barley	1.02	1.22
Oats	.60	.72
Rye	1.00	1.20

PCL  
10/19/76/AB

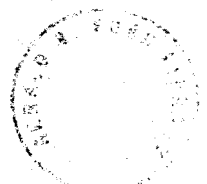

## SOYBEAN SITUATION

- Q. In recent years the growth of uses for soybeans has spurred increased plantings. Markets for soybeans, soybean oil, soybean oil meal, and other by-products are increasing both at home and abroad. What is the outlook this year for soybean growers?
- A. Soybean production this year is forecast at 1,250 million bushels. This is about 2% (or 25 million bushels) below earlier forecasts and about 18% below last year. This is a short crop, and current prices show it. The crop, however, is not what you would describe as "alarmingly low".

The harvest of soybeans was finished mostly ahead of other years (only a small acreage remains unharvested).

Note: There is some concern among soybean growers that the sharp increase in palm oil production and imports in the last five years will erode the market for US soybean oil. It is estimated that projects financed by international development banks accounted for about a fourth of the increase in world palm oil production and about a fifth of the increase in exports. Last summer (July 26) the US indicated it would no longer support loans by international development banks to expand palm oil production for export trade purposes. This, plus the fact that palm oil no longer enjoys a price advantage over our soybean oil, should cause the threat to our market to decline.

PCL  
10/27/76/AB

AGRICULTURE AND THE TRADE NEGOTIATIONS

- Q. In the current "Tokyo Round" of negotiations in Geneva, will agriculture be sold down the river again?
- A. I have directed our negotiators to insist that agriculture be an integral part of those discussions. The only way to obtain the best possible agreements for US farmers is for agricultural and industrial issues to be treated in one package. So far, we've been successful in this approach.

Under the Kennedy Round of negotiations a few years ago, agriculture did not fare well because agricultural tariff concessions were negotiated separately from industrial concessions. You have my assurances that farmers will not be sold down the river by my Administration during the current negotiations -- or at any other time.

I have also ordered our negotiators to vigorously represent our Nation's economic interests, guard against protectionism, and insist that the principles of fair trade be scrupulously observed.

PCL  
10/20/76/AB

## FUNDING OF LOW-INCOME WEATHERIZATION ASSISTANCE

- Q. Why has your Administration not provided funds for weatherization of low-income housing as authorized in the Energy Conservation and Production Act of 1976?
- A. We are in the process of preparing a supplemental budget request for fiscal year 1977 which includes funds for this program. I will present this request to Congress shortly after its return in January.

The law which authorized this assistance measure was enacted in mid-August and there was simply not enough time to get a bill to appropriate funds through the Congress before it adjourned on October 2.

As President, I have pushed for energy conservation of this kind for a long time. I first proposed to the Congress weatherization assistance for low-income groups and the elderly in January 1975, as part of my comprehensive Energy Independence Act.

### Background

The HEW-Labor appropriations bill contains some \$22.5 million for weatherization assistance to be administered through the Community Services Administration.

The ECPA authorizes \$55 million to be administered through FEA for essentially the same purpose.

OMB is now preparing a budgetary supplemental for the FY 1977 FEA program and an approach for relating and coordinating the FEA and CSA programs.

SIGNING OF THE ALASKAN NATURAL GAS  
TRANSPORTATION BILL (S. 3521)

Q. Why were you reluctant to sign the Alaska Natural Gas Transportation bill since you proposed legislation for the same purpose last February?

A. I was not reluctant to sign that bill.

There were some provisions in my own version that would have permitted us to move more quickly but, on balance, the bill I signed is an important step toward the achievement of our energy independence goal. It will expedite the selection of a route and construction of a system to bring Alaskan natural gas to the lower 48 states.

Background

Briefly, the act is procedural; it allows you and Congress to share responsibility for deciding among three alternative systems.

One, and probably two, of the routes that have been proposed would deliver natural gas directly into the Midwest via Canada and our northern states. The three alternative routes are:

(1) Arctic Gas pipeline from northern Alaska into northwest Canada and southward to the Montana border, then across the northern tier of States to Kankakee, Illinois.

(2) Northwest-Alcan would modify the routing in Alaska and Canada but probably hook up with a new Montana-to-Illinois pipeline.

(3) El Paso would avoid Canada by pipelining gas south through Alaska to a warm-water port where gas would be liquified, shipped by tanker to California, converted back to gas, and pipelined to Texas -- where presumably it would be put into existing pipeline systems and reach the Midwest that way.

INTERIM REPORT OF THE COMMITTEE ON  
URBAN DEVELOPMENT AND NEIGHBORHOOD REVITALIZATION

- Q. The Committee's report does not advocate additional Federal funds for cities. Isn't that what is really necessary to end urban blight, stagnant economies, and the deterioration of city neighborhoods?
- A. We all know that money alone will not solve these problems. The Federal government in past years has spent billions in misguided programs like urban renewal which have worsened urban difficulties rather than improve them.

What is required is community effort, real cooperation between local officials and Federal officials, and well-designed programs. I'm thinking here of Administration programs like Revenue Sharing and Community Development Block Grants, which furnished cities with the resources to deal with problems according to their own priorities rather than those directed by Washington. This approach is the democratic way to deal with urban problems.

The report of the Committee on Urban Development and Neighborhood Revitalization opposes massive additional Federal funding at this time. It concludes that if spending programs are properly coordinated and targeted, the billions of Federal dollars now being spent may be enough.

INDIANA  
STATE PROFILE

INDIANA (Hoosier State)

Capital: Indianapolis

Are: 36,291 square miles (ranks 38th nationally)

Famous Citizens: Wendell L. Wilkie, Wilbur Wright, Lew Wallace, Cole Porter, Hoagy Carmichael, James Whitcome Riley, Ernie Pyle, Booth Tarkington, Gene Stratton Porter, Steve McQueen, Frank Borman.

Demographics:

- Population: 5,330,000 ; 2.57% of U.S. total, ranked 12th nationally.\* Urban-53%; Rural-35%; Suburban 12%.
- Median Age: 27.2 years (28.1 nationally)
- Education: (over age 25)  
Four Years High School-53%  
Four Years College-8%.
- Median Years Education: 12.1 years (12.1 nationally)
- Median Family Income: \$9966, ranked 16th nationally, White Families-\$10,096; Black Families-\$7904; Families Below \$3,743 - 7%.
- Work Force: Women-782,788 (37%); Men-1,330,494 (63%)  
Civilian Work Force: Craftsmen, foremen - 15%; Professional, technicians, administrators, managers, clerical - 30%; Operatives and non-farm laborers - 25%; Other - 30%. 9,848 workers were employed in the Armed Forces, or .4% of the total work force.
- 1974 Share of Federal Tax Burden: 2.49% of US total, (ranked 11th).
- Racial/Ethnic Groups: White-93%. Black-6.8%.  
Total Foreign stock-7%.
- June 1976 Unemployment: 5.6%.

Economic Base:

AGRICULTURE: Corn (ranked 3rd nationally), soybeans (ranked 3rd).

---

\* 1974 U. S. Department of Commerce Figure, Statistical Abstract of the U. S. 1975, p. 12.

Livestock: Hogs (ranked 3rd), Chickens (ranked 7th).

--Farm receipts totaled \$2.8 billion for both crops and livestock and was 8th highest among the states.

MINERALS: (ranked 24th nationally) Principle minerals in order of value include coal, cement, stone, sand and gravel. Also petroleum, limestone, clay and gypsum are important.

--Total mineral production was valued at \$411 million in 1974.

MANUFACTURE: Leading major industry groups in value added by manufacture include electrical equipment, primary metal and transportation equipment. Also chemicals and food processing.\*

--Total value added by manufacture was \$12 billion in 1974.

OTHER:

-- Leader in production of pre-fabricated wood products and furniture.

-- Tourism brings in an estimated \$500 million per year.

-- Per capita income was \$5263 in 1974.

History:

-- 17th century saw the arrival of Europeans (French)

-- 1689-1763 - French-Indian War - Colonies and trade expand.

-- Treaty of Paris in 1763 ceded most of Canada and all of US east of Mississippi to England.

-- 1783-1816 - Indiana organized as territory of US

-- 1815 - Indians cease to be major obstacle to White settlement.

---

\*The Calumette region of the state's NW corner has one of the heaviest concentration of industry in the world.

History continued:

- 1816 (December 11) Became 19th state.
- 1800-50s - Pioneer period. Influx of people into the general area.
- 1860s - Indiana joins Union in Civil War.
- 1888 - Benjamin Harrison of Indiana wins Presidential election.

JRH 10/20/76

INDIANA  
PRESS ANALYSIS

CAMPAIGN: NATIONAL ISSUES

Carter Mr. Big Government

Editorial criticizes Jimmy Carter for running on an anti-big government platform and pro-economy campaign. Says he runs on a party platform which calls for new programs that Republicans estimate would cost \$200 billion a year. Calls his record as Georgia Governor a "sorry one" where the record shows state budget increases from \$1.057 billion in 1971 to \$1.675 billion in fiscal 1975, for an increase of 58.5%. Says the end result of Carter programs would be more red-ink spending, more inflation, and higher prices that hurt lower and middle income Americans most of all.  
--Editorial (10/20/76)

anti-Gun Control

"It is no one's right to prevent a person from taking risks in defense of himself or his family by removing from him the legal access to handguns."  
--Editorial (9/29/76)

National Debt Congress' Fault

"The debt was contracted by the only branch of the Federal government that is empowered by the Constitution to authorize spending and borrowing of money on the credit of the U.S. -- the Democrats. Congress throughout this giddy time was controlled by the very party whose foxy orators are lamenting those awful, inflation-fueling deficits from today's equivalent of stumps and soap boxes throughout the land -- the Democrats."  
--Editorial (9/29/76)

Debate #1 Ford the Winner

Editorial derides the liberal analysts who called Debate #1 a draw. Says "Carter came across much as in his campaign - fuzzy on the issues, unclear as to where he stands, not too well informed. In contrast, President Ford spoke as one already dealing with the issues, able to demonstrate the benefits of his ongoing policies, that he has kept the nation at peace and enjoying an economic upturn."  
Editorial (10/3/76)

anti-Harriman Soviet Visit

Editorial disapproves of Averill Harriman's meeting with Brezhnev in Moscow and says "it is quite unsuitable that he should busy himself explaining our elections to the head of a foreign government." Calls on Harriman to explain to the American people who initiated his meeting with Brezhnev and what was the nature of the encouragement he says he received from Carter and the State Department. Says it smacks of "kitchen cabinet diplomacy."

--Editorial (10/15/76)

Carter Tax Error

Editorial derides Jimmy Carter's solution to reduce property taxes to allow local government to use Federal revenue sharing funds for current expenses. Says "difficulty with this proposal is that once a locality uses Federal funds to pay the salaries of teachers or firemen or city administrators, it becomes dependent on Federal government for a continuation of those funds ...for the federal government to siphon off local tax money in Federal taxes, then feed it back -- less Federal overhead and waste -- is the long, wrong way round." Says "don't count on it" for Carter to understand the flaw in his program.

--Editorial (9/76)

Blame Congress for High Prices

Editorial says Wholesale Price Index rise advance of 0.9% is not the President's fault but that of Congress. Says for years "Democratic Congress hasn't been able to resist the temptation to spend, spend, spend. Says the American people should elect a fiscally responsible Congress this fall.

--Editorial (10/13/76)

Corporation Taxes

Says it is doubletalk to say you will soak the corporations instead of the middle class because "when facts are substituted for rhetoric it becomes clear that proposals to increase taxes on large corporations to soak 'the rich owners' of them are so much demagoguery...What politicians who make these proposals are really saying is that they're out to soak not the rich but millions of ordinary Americans."

--Editorial(10/76)

Flip Flop Carter (anti-Carter)

Examines Carter's various statements on busing, drugs, big government and oil companies and concludes his "flip-flops" are a matter of serious concern and "will the real Jimmy Carter please stand up" has become a national joke.

--Editorial (9/28/76)

## INDIANAPOLIS STAR

### Demo. Veto Record Bad

According to Indiana University historian Richard Kirkendall, Mr. Ford has a record of 55 vetoes in two years -- not much in comparison with previous Presidents. The all-time veto champion was Democrat Grover Cleveland with 584 and Franklin Roosevelt vetoed 635 bills in 12 years in office. Harry Truman had 250 and Kirkendall says statistics prove having the same party in office and the Congress does not guarantee unanimity.

--Article (9/9/76)

### Carter/Kelley

Alice Widener criticizes Jimmy Carter for his lack of compassion concerning FBI Director Kelley. She criticizes Carter for favoring amnesty while having expressed no moral outrage over Ted Kennedy's incident at Chappaquiddick or Jody Powell who was thrown out of the AF Academy for cheating.

--Column (9/14/76)

### Ford Will Win

Holmes Alexander predicts President Ford will win in November because of his incumbency advantage, improving economy, and the President's record of restoring faith in the government. Alexander calls Carter a braggart who is too smug and candid. Predicts Carter will lose all debates.

--Article (9/13/76)

### Dems. Nitpick on Economy (pro-Ford)

Editorial criticizes Democrats for nitpicking at the one tenth of one percent rise in unemployment during August. Praises President Ford's handling of the economy this year.

--Editorial (9/8/76)

## GENERAL ISSUES

### End Revenue Sharing

Editorial favors the end of federal revenue sharing at the end of this year, with an according cut in federal income taxes. Calls revenue sharing, in its present form, a boondoggle and says Senator Proxmire's proposed amendment to funnel the money through state legislatures would make the program worse."

--Editorial (9/16/76)

INDIANAPOLIS STAR

Clean Air Act

Editorial criticizes Congress for its lack of action on the proposed amendments to the Clean Air Act of 1970. Because of the inaction, production runs of 1978 model cars will start late and the prices will have to include the effect of delay costs which could have been avoided.  
--Editorial (9/76)

Medicaid Abuses

Editorial cites the mismanagement of Medicaid as a reason for not expanding national health care programs. Advocates the entire revision of the Medicaid program.  
--Editorial (9/8/76)

FOREIGN POLICY

Korea Incident (pro-Administration)

Supports the U.S. show of strength following the murders at the Korean border. Says the U.S. "should stick relentlessly to its demand that the neutrality of the zone be respected."  
--Editorial (9/8/76)

Kissinger in Africa (pro Kissinger)

Editorial wonders if Secretary Kissinger really knows what he is doing in Africa and says his worst critics believe he is indulging himself as a world-wide VIP for the last time. Editorial gives him "the benefit of the doubt" but is concerned about what will happen to Rhodesians and other Africans if black rule comes to reality. Says there will not be majority rule even if blacks rule these countries.  
--Editorial (9/22/76)

Vietnam Veto (pro-Ford)

Approves of President Ford's decision for a U.S. veto of Vietnam's application for U.N. membership. Says "U.S. approval would simply sanction the Vietnamese Communists ruthless suppression of freedom in the South" and "would break faith with the families of the 800 Americans still missing in Indochina."  
--Editorial (9/11/76)

## INDIANA

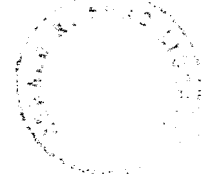

Nearly \$600 million in general revenue sharing payments have been returned from the Federal treasury to the State and local governments of Indiana since the first revenue sharing checks went out in December of 1972.

The money is returned to communities large and small throughout the State so that your government officials may have the freedom to determine which of your needs are of greatest priority and to meet those needs adequately.

The State government of Indiana has received nearly \$200 million already through general revenue sharing and can expect to receive another payment of \$11.7 million in January. In recent years, the State has spent approximately one-third of this money for education and another third for general governmental expenses, with the remainder divided among health services, public safety, recreation, and corrections.

The 91 counties, 563 cities and 1,000 townships of Indiana which receive regular, quarterly revenue sharing payments have spent their money for a variety of programs and services according to locally determined needs. We in Washington recognize that the needs of citizens living near the banks of the Wabash in Tippecanoe County are far different from those of urban residents living in the industrialized area along Lake Michigan.

One of the more interesting things I discovered about Indiana is the popularity of certain township names. For example,

there are 25 Center Townships, 18 Liberty Townships, and 35 Union Townships in the State of Indiana. Those named for U. S. Presidents, however, seem to be the most popular with 46 named for President Washington and 47 named for President Jackson. Fortunately, since each of the 38,000 governments throughout the country has its own unique identifying revenue sharing account number, we have had no problem making sure that each of these townships receives the correct revenue sharing payment it is entitled to on time.

As far as the use of revenue sharing funds in Indiana is concerned, let me cite a few examples. Shelbyville has spent its money for the lighting of tennis courts and other improvements of parks and recreational facilities. The town of Lynn purchased a new fire truck. Elkhart County has used its shared revenues for extensive repairs of county roads. In the city of Hammond, road repairs were deferred so that revenue sharing funds could be used to help meet increased salary and other operating costs of various city services. Vincennes has used a portion of its money for street repairs, sewer construction and parks and recreation.

Here in Indianapolis, revenue sharing funds have been used for construction of the city's sports stadium, operating and maintenance expenses connected with streets and highways, and police and fire services. More recently, the bulk of revenue sharing funds have been used for police and fire salaries.
