FOR RELEASE 6:30 P.M., EDT, THURSDAY OCTOBER 3, 1974

UNIFORM CRIME REPORTING (January - June, 1974)

Crime in the United States, January - June, 1974, as measured by the Crime Index offenses, increased 16 percent during the first six months of 1974 when compared to the first six months of 1973. The violent crimes of murder, forcible rape, robbery, and aggravated assault, as a group, increased six percent. Forcible rape was up eight percent, robbery and murder each increased five percent, while aggravated assault increased seven percent. The property offenses of burglary, larceny-theft, and motor vehicle theft were up 17 percent as a group. Larceny-theft increased 20 percent, burglary 16 percent and motor vehicle theft four percent. Large core cities having 250,000 or more inhabitants as a group reported a ten percent increase in the volume of Crime Index offenses. Crime in the suburban areas continued to increase with a rise of 21 percent. The rural areas reported an increase of 19 percent (**Table I**). Geographically, crime in the Southern States increased 21 percent, the Western States 15 percent, the North Central States 14 percent, and the Northeastern States twelve percent (**Table 2**).

(1) 1973 figures not comparable with 1974, and are not used in trend tabulations. Trends in this report are based on the volume of crimes reported by comparable units. Agency reports which are determined to be influenced by a change in reporting practices for all or specific offenses, or annexation, are removed from trend tables. All 1974 crime figures from reporting units are preliminary. Final figures and crime rates per unit of population are not available until the annual publication.

FEDERAL BUREAU OF INVESTIGATION UNITED STATES DEPARTMENT OF JUSTICE

OFFICIAL BUSINESS PENALTY FOR PRIVATE USE, \$300

> PRESIDENT THE WHITE HOUSE WASHINGTON, DC

HONDRABLE GERALD R. FORD

FIRST CLASS MAIL

Ŀ

FOR RELEASE 6:30 p.m., EDT, THURSDAY October 3, 1974

PLEASE NOTE

2

Figures used in this release are submitted voluntarily by law enforcement agencies throughout the country. Individuals using these tabulations are cautioned against drawing conclusions by making direct comparisons between cities due to the existence of numerous factors which affect the amount and type of crime from place to place. Some of these factors are listed in the annual Uniform Crime Reports. More valid use can be made of these figures by determining deviations from national averages and through comparisons with averages for cities in similar population groups. (Table 1) It is important to remember that crime is a social problem and, therefore, a concern of the entire community. The efforts of law enforcement are limited to factors within its control.

F131

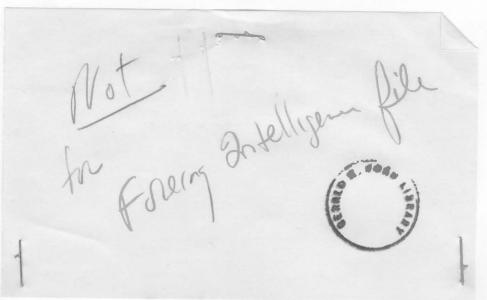

(For the Press Briefing)

Jack Hushen said -- in connection with the Boston situation -- Ron may be asked whether or not the President is being kept aware of the developments there. They would like to respond "Yes, by his Legal Counsel as the situation warrants."

Hushen has talked with people at Justice and they say things are fairly routine. FBI is investigating the stabbing and Community Relations Services and trying to mediate the disputes.

December 13, 1974

INFORMATION

MEMORANDUM FOR THE PRESIDENT

FROM: PHILLIP AREEDA

The United States Atterney for Chicage is now investigating the Illinois Bureau of Investigation.

A representative of a target of that investigation has warned the Justice Department that its continuation will implicate the Federal Bareau of Investigation, the Internal Revenue Service, and another unspecified Federal agency in illegal demostic wiretapping; it was suggested that Federal officials have committed perjury, destroyed files, etc. If true, the consequences will be very serious for the future of the FBL.

Nevertheless, the Justice Department is going ahead with its investigation. This matter is known only to the Deputy Attorney General and the Chicago United States Attorney's office.

TO : Phil Buchen

FROM: Calvin J, Collier Associate Director for Economics and Government

The attached materials detail the current problems with the draft FBI budget submission to Congress.

Tab A is the Justice Department (Budget Office) summary of the changes that the FBI has been requested to make to be more supportive of the President's budget. In the left margin is noted the tentative results of the Department's negotiations with the Bureau on these points.

Tab B will be relevant pages of the proposed budget submissions to which the notes in Tab A refer.

Although some of these points, in themselves be minor, we are deeply concerned that the Bureau is being permitted to undermine Presidential budget decisions. My hope is that the Attorney General straightens this matter out as soon as possible. The budget submissions are required to go to the Hill on Monday.

REQUIRED CHANGES TO THE FBI'S CONGRESSIONAL SUBMISSION

Department of Justice Federal Bureau of Investigation Appropriation Summary Statement

The appropriation request for the 1977 fiscal year is \$466,777,000. This represents a decrease of \$15,015,000 or approximately 3.1% under the anticipated appropriation of \$481,792,000 for fiscal year 1976. The anticipated 1976 amount includes an appropriation of \$468,700,000 plus a pending supplemental request of \$13,092,000 to provide for the October 1975 pay raises. The appropriation request provides for \$14,181,000 in uncontrollable increases and \$1,939,000 in program increases for temporary work-years to train replacements for special agents mandatorily retiring under P.L. 93-350 by January 1, 1978. These requested increases are offset by decreases of: \$516,000 transferred to the Department of State for Shared Administrative Support Services; \$4,895,000 to be derived from non-recurring fiscal year 1976 items; [\$8,156,000 to be achieved through smaller] 2 .. payments to special agents for administratively uncontrollable overtime (AUO) performed; and program decreases of \$5,000,000 for equipment purchases, \$4,696,000 for an approximate one percent 3. reduction in personnel and \$7,872,000 due to a planned 50% reimbursement program for State and local training in 1977. The \$15,015,000 in net decreases provides for 442 fewer direct work-years in fiscal year 1977 than during fiscal year 1976. There is provision for an increase of \$7,872,000 and 272 more work-years of reimbursables effected by the requirement for 50% reimbursement by State and local governments for FBI provided training in fiscal year 1977. The request represents the absolute minimum amount required to carry out existing FBI responsibilities and contains no provision for any unforeseen contingencies which could arise from various sources, including additional investigative responsibilities or service functions which may be subsequently assigned to the FBI.

Basic authority for the activities of the FBI is contained in Chapter 33 of Title 28, United States Code. Title 18, Section 3052, United States Code, as amended January 10, 1951, provides that "The Director, Associate Director, Assistant to the Director, Assistant Directors, inspectors and agents of the Federal Bureau of Investigation of the Department of Justice may carry firearms, serve warrants and subpoenas issued under the authority of the United States and make arrests without warrant for any offense against the United States committed in their presence, or for any felony cognizable under the laws of the United States if they have reasonable grounds to believe that the person to be arrested has committed or is committing such felony." The FBI has also been vested with certain auxiliary investigative responsibilities by the Congress, the Attorney General and the President of the United States relating directly to the Nation's security.

In order for the FBI to carry out its mandated responsibilities in the most efficient and effective manner possible, pilot programs and studies have been initiated from time to time to determine how to best allocate resources to the highest priorities. For example, during fiscal year 1975, the FBI began testing and evaluating the probable effects of a major shift in investigative emphasis which involves a decreased involvement in less complicated marginal matters, with increased emphasis being given to selected high-priority criminal and security matters. The initial testing of this

Appropriation Summary Statement - Continued

Notwithstanding any changes in emphasis of criminal matters, the FBI must continue its concentrated efforts in the counterintelligence and internal security areas to combat those individuals and organizations who are intent on subverting our form of government. Emphasis will be placed on protecting the internal security of the United States from the efforts of foreign intelligence services engaged in hostile activities and from the activities of terrorist elements. The FBI's authority and jurisdiction in foreign counterintelligence are based on statute, on the President's constitutional powers and responsibilities and on the authority of the Attorney General.

Requests for information under the Freedom of Information and Privacy Acts have increased from a total 6 of 447 requests for the calendar year 1974 to a total of 13,875 requests for calendar year 1975. This 7 has necessitated reallocation of qualified agent and clerical personnel.

2. Identification by fingerprints:

The FBI serves as a central repository for fingerprint cards submitted by law enforcement agencies. governmental agencies, and private citizens for identification purposes. The appropriation request includes \$51,095,000 for fiscal year 1977 for this activity. This represents a decrease of \$1,065,000. The Identification Division has experienced an increased workload while operating at levels below authorized strength, because of cuts in 1976 fiscal year personnel. The response time for finger-V print receipts has slipped from a desirable three days to slightly more than five days. It is anticipated that fingerprint work will continue to expand. For example, the expungement workload will continue to grow because of recent court decisions regarding "detention only" arrests. The State of California alone will request purging of more than two million records over the next two years. Additionally, a recent court order in the District of Columbia will require the return of all fingerprint cards submitted by the Metropolitan Police Department since January 30, 1968. It is estimated that over 200,000 fingerprint cards must be returned in addition to the expungement or purging of this arrest information from the files of the Identification Division. The funds provided for this program are also used to support the fingerprint automation effort which is progressing very satisfactorily. The benefits of this effort will be realized in future years and will be reflected by substantial savings in funds and personnel.

3. Criminal and scientific laboratory:

The FBI Laboratory will require \$12,043,000, a decrease of \$1,029,000, for fiscal year 1977. This will permit the FBI to operate its fine crime laboratory for the scientific examination of physical evidence and provide services, including testimony of laboratory personnel, on a cost-free basis to state and local law enforcement agencies as well as all Federal agencies. The decrease has been achieved to a large extent by deferring equipment purchases which were planned to be made during fiscal year 1977.

Appropriation Summary Statement - Continued

4. Training:

The training program will require \$8,282,000, a decrease of \$7,978,000, for the fiscal year 1977 in order to train the FBI's own personnel and provide requested training assistance to state and local law enforcement personnel at the FBI Academy, Quantico, Virginia, and at the local level. The reduction in funds for this activity during fiscal year 1977 is the result of a decision, not by the FBI, to require reimbursement from state and local trainees for a portion of the cost of training provided to these recipients. During the 1977 fiscal year, these charges are to be levied at 50 percent of the cost of the training provided these trainees. This mandated policy to require reimbursement for training provided to state and local law enforcement personnel is expected to produce \$7,872,000 in reimbursements from state and local governments.

Recognizing that adequate training is the key to effective law enforcement, the FBI will continue its FBI National Academy program and provide specialized training in critical areas of current interest. Among specialized subjects offered will be organized crime, kidnaping, terrorist extremism and white-collar crime. The FBI Academy will also devote effort to the training of agents to partially replace those subject to mandatory retirement as of January 1, 1978, due to provisions of Public Law 93-350.

5. General administration:

The amount requested for the administration of the FBI is \$27,233,000, a decrease of \$63,000. These funds will provide for overall management direction of the FBI's activities; evaluation of policies, procedures and operations; financial management; legal supervision; instruction and research; and communications geared to increase public awareness of the responsibilities and services of the FBI.

Adjustments to Base and Built-in Changes - Continued

| | | Contraction of the second s | | |
|------|--|---|------------|---------------------|
| | | Permanent Positions | Work-Years | Budget Authority |
| J 4. | Increased printing costs | | | \$115 |
| 1 | This provides for an 11% increase over the \$1,043,000 available for the 1976 fiscal year and is attributable to rising costs of material and publications printed by the Government Printing Office. [Actual costs incurred for the 1975 fiscal year amounted to \$1,526,000.] | | | |
| 5. | Increased costs of supplies and materials | | | 842 |
| 2 | This increase is primarily attributable to the increased cost of gasoline. In the 1975 fiscal year, 6,696,000 gallons of gasoline were consumed by the FBI. At the average cost of 36 cents per gallon prior to the oil embargo, this gasoline would have cost \$2,410,560. At the present rate of 59 cents per gallon, the cost is \$3,950,640. Of the increase of \$1,540,080, \$842,000 is being requested as an uncontrollable item. | | | |
| V 6. | Increased costs of communications, repairs and equipment. | | | 682 |
| | Actual costs for communications in fiscal year 1975 were \$952,000 more than the \$3,273,000 allowed in fiscal year 1976. Of this increase, \$334,000 is requested to fund higher tariff rates actually experienced in fiscal year 1975. Costs for repairs and alterations in fiscal year 1975 were \$470,000 higher than the \$2,702,000 provided for in fiscal year 1976. Of this amount, \$225,000 is being requested. Actual costs experienced for regular equipment are \$13 per employee higher than the \$120 per employee allowed for the 1976 fiscal year. With 19,633 employees funded for the 1976 fiscal year, an increase of \$255,000 is needed. Of this amount, \$123,000 is being | | 15,0 | es/s |

Base Program

The outputs of this program provide for the conduct of security, criminal, civil and applicant investigations. The FBI initiated a study in fiscal year 1975 with the objective of determining whether field offices could produce a more meaningful and significant investigative product if they did not have to be concerned with maintaining a caseload. Quality of caseload and not quantity was stressed. Four offices participated in this study and results showed that while numbers of cases declined, measurable statistics in some instances actually increased. This concept was extended to all FBI field offices in August 1975.

During the fiscal year 1975, the FBI placed additional emphasis on the more complex and sophisticated crimes such as white-collar crime and organized crime which produced excellent results. These investigations, while requiring substantially more resources than less complicated matters, are expected to have the greatest favorable impact and overall benefits to the American public.

Increasingly complex kidnaping and extortion plots as well as bank robberies continue to place heavy demands on FBI manpower. These types of crimes have resulted in personal injury and death to innocent people as well as large monetary losses to the victims and require immediate response and persistence of personnel in order to protect victims and apprehend and convict the (perpetrators,

There is an apparent trend to include more than one subject in these nefarious schemes, in an attempt to insure escape and create a logistical problem for law enforcement. These types of crimes demand the increased use of equipment as well as manpower. It is the policy of the FBI, in these matters, to spare no effort or expense where the welfare of a victim is involved.

In order for the FBI to adequately fulfill its responsibilities, it is necessary for special agents to perform substantial amounts of unscheduled and administratively uncontrollable overtime. Such

23

overtime is necessary to bring to a logical conclusion those matters demanding immediate attention outside of regular business hours. This overtime is expected to continue in future years as in the part.

The overtime performed by the agent staff during the 1975 fiscal year amounted to 4.4 million hours. The average was some 2 hours and 20 minutes each workday. The overtime performed was equivalent to the full-time services of 2,117 agents. The cost of employing that number of agents would have been \$46.8 million. The administratively uncontrollable overtime payments to agents amounted to \$28.9 million with a resulting savings to the Government of \$17.9 million which is equal to the cost of 811 agents.

Security Investigations

Relations between the United States and the Soviet-bloc nations continued to improve during the past year. This resulted in increased investigative problems for the FBI as larger numbers of their official personnel were assigned to this country. As of December 1, 1975, Soviet-bloc and Albanian officials present in the United States was 1,938 individuals. This figure was composed of 1,255 Soviets and 683 representatives from Albania and the Soviet satellites: Bulgaria, Czechoslovakia, Hungary, Mongolia, Poland, Romania and East Germany. These personnel are assigned to official or quasiofficial establishments which can and do serve as bases for intelligence operations directed against our country.

The Soviets have established a consulate in San Francisco and have recently purchased property in New York City to serve as the second consulate in the United States. Locations for additional proposed consulates are Chicago, New Orleans, Houston, Los Angeles and St. Louis. No Soviet-bloc establishments currently exist in the last four cities. Recent developments indicate substantial increases in Soviet commercial-related officials can be expected in the near future. The Soviets have requested permission to open a branch of the office of the Soviet Trade Representative in New York City, with the main headquarters to remain in Washington, D.C. The Kama River Purchasing Commission has recently added a substantial number of official representatives to its establishment here, as has the Amtorg Trading Corporation. The Soviets are also attempting to obtain permission to set up two new stock corporations at least 50% Soviet owned to provide for exports to the United States.

A Czechoslovakian consulate is scheduled to open in Chicago in 1976. The Hungarian Government has begun construction of a new embassy in Washington and has already obtained permission to place a new Hungarian consulate in Cleveland, Ohio. The Bulgarian Government is negotiating for construction of a new embassy in Washington which will provide for a much larger staff. The Polish Government may also begin construction of an expanded embassy in Washington and has been seeking space to establish a permanent Polish Trade Mission Office in San Francisco. Romania may be opening a consulate in Chicago within a year.

24

Base Program

The outputs of this program provide training for FBI employees in support of the FBI's basic responsibility to conduct and coordinate investigations and provide, upon request, a comprehensive training and educational program to bona fide members of state and local law enforcement agencies and other members of the criminal justice system. In the past, training has been afforded to state and local law enforcement agencies on a cost-free basis upon request of the agency. In fiscal year 1977, this reduction will necessitate the FBI requiring 50% reimbursement from state and local governments for such training. 7

The Training Division's accomplishments during fiscal year 1975 focused around the now fully operational FBI Academy at Quantico, Virginia, its training programs and other services of the Division which were administered by FBI Headquarters personnel. Record-high training and services were provided in all areas of accomplishment.

For example, four national symposiums were held during fiscal year 1975 at the FBI Academy. These covered Crime Laboratory Development, Law Enforcement Training, Terrorist Activities and Uniform Crime Reporting. Total attendance at these symposiums was 476.

Specially trained FBI Agents assigned to the Bureau's 59 field divisions provided 108,383 hours of instruction while participating in 10,516 law enforcement schools attended by 319,663 criminal justice personnel. Topics presented ranged from basic law enforcement subjects to specialized matters such as kidnaping, hostage situations, extremist groups, organized crime and legal issues.

Instructors from the FBI Academy conducted over 200 specialized schools for law enforcement administrators in such topical areas as crisis intervention, executive development, forensic science, instructor development and legal matters.

A decrease of \$7,872,000 in the funds provided for training has been made for fiscal year 1977. These funds are equivalent to 272 permanent positions which represent 121 special agents and 151 clerical personnel. The FBI will require 50% reimbursement from state and local governments for training services provided to their personnel which were previously offered cost free.

A reduction of \$106,000 in equipment funds is being made in this activity. This reduction represents a deferral of the purchase of recurring equipment such as training films, projectors, recorders, firearms and law reference material.

Criminal and Scientific Laboratory

In fiscal year 1975, there were 482,060 scientific examinations conducted by the FBI Laboratory. The Laboratory strives to make science a more useful weapon to law enforcement through research and studies to develop new and improved ways to apply this knowledge to law enforcement work.

Training Activities

The FBI, in addition to training its own personnel, provides cooperative training services to other law enforcement agencies at all levels of government. The long-established field police training program continues to expand and in the 1975 fiscal year, FBI Agents contributed 108,383 hours of instruction in 10,516 schools attended by 319,663 officers. Four sessions of the FBI National Academy were held during the fiscal year 1975 at the new FBI Academy on the Marine Corps Base at Quantico, Virginia. A total of 994 students was graduated. During this same period, 920 National Academy graduates were retrained at the Academy. In the fiscal year 1975, seminars were held for law enforcement officers on a variety of topics including hostage negotiations, Women-in-Policing, rape and bomb detection and investigation. Beginning with fiscal year 1977, training will be performed for state and local police agencies on a 50% reimbursement basis. Heretofore, this training has been conducted on a cost-free basis for these agencies.
