ATTENTION MAGAZINE RETAIL DEALERS

The Capital Distributing Company has made available to all retail dealers a display promotional allowance plan under the terms of which any participating retail dealer can earn an allowance of ten (10%) percent of cover price per sold copy of CB TIMES Magazine. Full details and copies of agreements for signature by participating retail dealers are available by writing to Circulation Manager, The Capital Distributing Company, Charlton Building, Derby, Conn. 06418. Allowances become effective with the next issue received for distribution following receipt of signed agreements and written acceptance by The Capital Distributing Company. This offer applies only in USA and Possessions and Canada.

YOU HAVEN'T MISSED ANY ISSUES!

Have you noticed that you are reading the June issue of The CB Times? And the last issue you saw was marked February, right?

Yes . . . you're right. And here's why.

Just as many new things in CB are happening, so are things at The CB Times. As you can see we have switched our format from newspaper tabloid to standard magazine. This was done at the request of many readers and hundreds of our distributors around the country. The date on the magazine was adjusted so it will be current when it appears on your local newsstand.

But what about my subscription? Don't worry about a thing. We have instructed our computer to extend everyone's subscription so that every subscriber receives the full number of issues paid purchased.

If you have any questions drop us a line. We'd also like to hear your opinions on our new look. Write us: The CB Times, 1005 Murfreesboro Rd., Nashville, TN. 37217.

Para Dynamics Corporation RF Power Scanners

MODEL PDC 700

PDC 700 with a single large 4" x 6" meter lets you read it all with ease and precision.

Dimensions: 9 3/4" x 4 1/2" x 2 3/4"
Shipping Wt.: 4 lbs.
Suggested List: \$89.⁹⁵

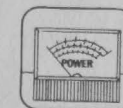

MODEL PDC 600

PDC 600 brings revolutionary simultaneous reading of RF Power, Modulation and SWR.

Dimensions: 9 3/4" x 4 1/2" x 2 3/4"
Shipping Wt.: 4 lbs.
Suggested List: \$79.⁹⁵

RF POWER SCANNERS FUNCTIONS & SPECIFICATIONS

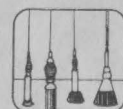

POWER FUNCTION

Output power is indicated directly on the power meter. The power switch positions 10, 100 and 1000, corresponds to 0 - 10, 0 - 100 and 0 - 1000 watts on the meter.

MODULATION FUNCTION

Modulation level is indicated directly on the modulation meter. This allows full time monitoring of modulation during transmission. The operator can make compensation of his voice level by making an adjustment in the microphone position or through the use of modulation boosters.

SWR FUNCTION

The Standing Wave Ratio is indicated on the SWR meter and allows continuous monitoring of the forward and reflected power ratio. This function is a must for CB'ers to determine how well their antenna is matched to their transmitter. An antenna mismatch may occur because of weather conditions, poor contacts of antenna sections, oxidation, cable leakages, etc.

• Capable of monitoring up to 1000 Watts Output Power

• Factory Calibrated at 27 Mhz

• Frequency Range Capability Extends to 220 Mhz

• Modulation Level 0 to 100% and Over Modulation Indication to + 3db

• Standing Wave Ratio (SWR)

• 100% solid state design minimizes size, increases reliability and accuracy

The RF Power Scanners stunning designs and rugged construction perfectly fit them for the mobile or base stations. Their simplicity of operation requires only two coax connections for the transmitter and the antenna terminals. The RF Power Scanners quality, accuracy and reliability has made them the most desired Monitoring and Test Equipment available today. NO OTHER INSTRUMENT ON THE MARKET CAN DUPLICATE THERE CAPABILITIES AND PERFORMANCE. Manufactured for laboratory standards and quality and used in a wide variety of Monitoring and Engineering applications. Best of all, the RF Power Scanners low, low prices has made them not only available but a must for all CB'ers and 2-way communication operators.

American Made
