Cancer Control Month, 1976

By the President of the United States of America

A Proclamation

The National Cancer Program, representing both Federal agencies and non-Federal organizations, is the most massive undertaking of its kind.

Through the Program, established by the National Cancer Act of 1971, and given new vitality by the amendments of 1974, we are continuing to explore the causes and eventual control of cancer. Cancers are being detected earlier, making them more amenable to diagnosis and treatment. Surgery, radiation, and chemotherapy are making further inroads on cancer and immunotherapy shows bright promise of joining them as a means of treatment. Research findings on the disease are now reaching the practicing physician faster than ever before.

Although we can take pride in these accomplishments, current cancer statistics remind us that we cannot be apathetic. It is estimated that 675,000 new cases of cancer will be diagnosed in our country in 1976. That means about 370,000 people will die of the disease. Only through relentless, aggressive support of cancer research and control can we eventually reduce these figures to an absolute minimum.

In order to give continuing emphasis to the cancer problem, the Congress, by a joint resolution of March 28, 1938 (52 Stat. 148, 36 U.S.C. 150), requested the President to issue annually a proclamation designating the month of April as Cancer Control Month.

NOW, THEREFORE, I, GERALD R. FORD, President of the United States of America, do hereby proclaim the month of April, 1976, as Cancer Control Month, and I invite the Governors of the several States and the Commonwealth of Puerto Rico, the Mayor of the District of Columbia, and the appropriate officials of all other areas under the United States flag to issue similar proclamations.

I also ask the medical and health professions, the communications media, and all other interested persons and groups to unite during this appointed time in public reaffirmation of our Nation's abiding commitment to cancer control.

IN WITNESS WHEREOF, I have hereunto set my hand this twenty-ninth day of March, in the year of our Lord nineteen hundred seventy-six, and of the Independence of the United States of America the two hundredth.

Cancer Control Month, 1975

By the President of the United States of America

A Proclamation

Our intensive effort against cancer, sustained by the constant dedication and determination of scientists, physicians, public officials and private citizens, continues to provide hope and assistance to ever-increasing numbers of Americans.

The National Cancer Act of 1971 was a landmark piece of legislation which authorized new Federal support for cancer research. The amendments of 1974 have added new emphasis to our National Cancer Program, especially in the dissemination of the latest scientific findings from the research laboratory and clinic to practicing physicians, cancer patients, and those in particular jeopardy of cancer.

Despite this progress, the conquest of cancer will not be easy or quick. Cancer statistics remain depressing. An estimated 665,000 new cases will be diagnosed in 1975. Although we shall ultimately achieve victory over these killer diseases, it requires our unwavering support of cancer research and control.

As a means of giving continued emphasis to the cancer problem, the Congress, by a joint resolution of March 28, 1938 (52 Stat. 148, 36 U.S.C. 150), requested the President to issue annually a proclamation setting aside the month of April as Cancer Control Month.

NOW, THEREFORE, I, GERALD R. FORD, President of the United States of America, do hereby proclaim the month of April, 1975, as Cancer Control Month, and I invite the Governors of the States and the Commonwealth of Puerto Rico, and the appropriate officials of all other areas under the United States flag, to issue similar proclamations.

To give renewed emphasis to this serious problem, and to encourage the determination of the American people to meet it, I also ask the medical and health professions, the communications media, and all other interested persons and groups to unite in public reaffirmation of our Nation's abiding commitment to control cancer.

IN WITNESS WHEREOF, I have hereunto set my hand this 26th day of March, in the year of our Lord nineteen hundred seventy-five, and of the Independence of the United States of America the one hundred ninety-ninth.

MEMORANDUM FOR: ROLAND ELLIOTT
FROM: MARGUERITE MCAULIFFE
SUBJECT: Cancer Control Month

Please arrange to have the attached letter robotyped to the individuals on the enclosed list. Only those names preceded by check marks need be done.

Thanks very much.
April 8, 1975

Dear

President Ford recently signed a Proclamation designating the month of April as Cancer Control Month, 1975. In his Proclamation the President states, "... the conquest of cancer will not be easy or quick. Cancer statistics remain depressing ... Although we shall ultimately achieve victory over these killer diseases, it requires our un-wavering support of cancer research and control."

The President asked that I send you the enclosed duplicate of his Cancer Control Month Proclamation as a small re-membrance of this occasion. It comes to you with his very best wishes,

Sincerely,

William J. Baroody, Jr.
Assistant to the President

Enclosure
MEMORANDUM FOR: ROLAND ELLIOTT
FROM: MARGUERITE MCAULIFFE
SUBJECT: Cancer Control Month

Please arrange to have the attached letter retyped to the individuals on the enclosed list. Only those names preceded by check marks need be done.

Thanks very much.

FOR IMMEDIATE RELEASE  MARCH 26, 1975

Office of the White House Press Secretary

THE WHITE HOUSE

CANCER CONTROL MONTH, 1975

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA

A PROCLAMATION

Our intensive effort against cancer, sustained by the constant dedication and determination of scientists, physicians, public officials and private citizens, continues to provide hope and assistance to ever-increasing numbers of Americans.

The National Cancer Act of 1971 was a landmark piece of legislation which authorized new Federal support for cancer research. The amendments of 1974 have added new emphasis to our National Cancer Program, especially in the dissemination of the latest scientific findings from the research laboratory and clinic to practicing physicians, cancer patients, and those in particular jeopardy of cancer.

Despite this progress, the conquest of cancer will not be easy or quick. Cancer statistics remain depressing. An estimated 665,000 new cases will be diagnosed in 1975. Although we shall ultimately achieve victory over these killer diseases, it requires our unwavering support of cancer research and control.

As a means of giving continued emphasis to the cancer problem, the Congress, by a joint resolution of March 28, 1938 (52 Stat. 148, 36 U.S.C. 150), requested the President to issue annually a proclamation setting aside the month of April as Cancer Control Month.

NOW, THEREFORE, I, GERALD R. FORD, President of the United States of America, do hereby proclaim the month of April, 1975, as Cancer Control Month, and I invite the Governors of the States and the Commonwealth of Puerto Rico, and the appropriate officials of all other areas under the United States flag, to issue similar proclamations.

To give renewed emphasis to this serious problem, and to encourage the determination of the American people to meet it, I also ask the medical and health
professions, the communications media, and all other
interested persons and groups to unite in public reaf-
firmation of our Nation's abiding commitment to control
cancer.

IN WITNESS WHEREOF, I have hereunto set my hand
this twenty-six day of March, in the year of our
Lord nineteen hundred seventy-five, and of the
Independence of the United States of America the one
hundred ninety-ninth.
