Office of the White House Press Secretary

NOTICE TO THE PRESS

HOSPITAL BULLETIN #3

Mrs. Ford had a much more restful night, awakening only once for medication. She has been sitting in a chair and walking for short intervals and is taking fluids this morning. She has had some mild temperature elevation, typical of a post operative course. The operative site is in excellent condition and all laboratory data and vital signs are within normal limits. The post operative course has been normal and uneventful thusfar. Her condition is good.
