

OCTOBER 2, 1974

Office of the White House Press Secretary

---

NOTICE TO THE PRESS

Dr. William Fouty reports that Mrs. Ford had a very good day, walking about her room without difficulty and without help. She has almost full mobility of her right arm, being able to use the arm to write, to eat, and to brush her hair. Mrs. Ford is now on a regular diet, enjoying beef bouillon, crackers and tea for lunch, and will have roast beef, peas and carrots, fruit cocktail and tea for dinner. Mrs. Ford's vital signs continue to be normal, with her post-operative recuperation uneventful. Her condition and spirits remain excellent.
