NOTICE TO THE PRESS

HOSPITAL BULLETIN #6 - 11:00 AM

Mrs. Ford's surgeon, Dr. William Fouty, at the National Naval Medical Center at Bethesda reports that Mrs. Ford had a most restful night, without interruption and was allowed to "sleep in" this morning. Her attitude and spirits are excellent. Today she will eat whatever she desires, and be allowed to move in and about the suite. For breakfast she had poached eggs, toast, marmalade and tea. As with any post operative patient, Mrs. Ford has not regained her full strength, but I would describe her post operative course to date as uncomplicated and her present condition as excellent. In light of Mrs. Ford's excellent recuperation, we will have only one daily report on her condition--the 11:00 AM Hospital Bulletin.
