POOL REPORT  
ON PRESIDENT'S EARLY MORNING  
SKI RUN

President Ford went off for his second ski run of his Vail visit about 10:30 A.M. He went up Vail Mountain on Gondola 1, accompanied by Secret Service agents and it is reported that a Vail friend went along, Tremmell Crowe, alleged spelling from unauthoritative sources. (Correct spelling is Trammell Crowe)

It was a crisp, bright sunny day on the mountains and scores of skiers were waiting on line to go up to the mountains.

A costumed Santa Claus and female helper wandered among the skiers.

The pool was not alerted in time to arrive on the slope to catch the President's departure. Hence, we have slim information. Suggest you check Ron Nessen for details and better information for the pool.
