MR

Gerald R. Ford, President  
United States of America  
The White House  
Washington, D. C. 20500

Dear Mr. President:

For the past several months, I've been investigating allegations that past Secretary of the Army, Howard Callaway improperly removed the name of LTC Wilfred Ebel from a promotion list signed by you and sent to the Senate for approval.

Much of the factual background of the matter remains unclear, although Pentagon logs indicate that you signed the promotion list on January 14, 1975, and the list was then sent to the Senate on January 15th. In order to clarify varying accounts on the succeeding sequence of events, it would be very helpful if you would clarify your own role in this process. Was LTC Ebel's name removed with your permission, and, if so, was the second list signed by you? Was the Senate officially notified of the change?

As you can well appreciate, there are numerous legal and constitutional issues yet to be resolved in this matter. The possibility that a Secretary of the Army illegally removed a name from a promotion list for reasons totally unrelated to that officer's military record are alarming indeed. Whatever information you can provide will be extremely helpful.

Sincerely,

Edward Mezvinsky  
Member of Congress

14. Virginia Smith and  
38 other Members  
Express concern about the competition the cattle industry faces from meat imports, "95% of which are chilled and frozen beef." Call upon the Administration "to address itself to this problem immediately -- either to negotiate the voluntary restraints on meat imports at a level which would make allowances for the imports of 'stew beef' and other 'prepared and preserved' meats, or take other administrative action under the law to control the imports of this kind. This request comes to you from Representatives of cattle-producing areas, and it is important to note that the cattlemen, generally, have approved the farm policies of this Administration as developed and enunciated by Secretary Butz. Any measures of relief from this unfair competition would reinforce the belief of the cattlemen that you have an understanding of their problems."
