

MEMORANDUM

THE WHITE HOUSE

WASHINGTON

~~SECRET~~/NODIS/XGDS

MEMORANDUM OF CONVERSATION

PARTICIPANTS: President Nixon
Vadim A. Trapeznikov, Soviet Academician
Dr. Guyford Stever, Science Adviser
Major General Brent Scowcroft, Deputy Assistant
to the President for National Security Affairs
Amb. Anatoli F. Dobrynin, Soviet Ambassador
to the United States

DATE AND TIME: Tuesday, March 20, 1973
12:00 Noon

PLACE: The Oval Office

[The press came in for photographs.]

The President: Here, take the seat of honor. General-Secretary Brezhnev sat there. Ambassador Dobrynin sets there [indicating].

I am sorry to hear about Mr. Kirillin.

Trapeznikov: He had an operation. He is getting better.

The President: Give him my regards.

Trapeznikov: He sends his best wishes.

Stever: Trapeznikov has done a great job in taking over as chairman. We will have a heart agreement in six months.

Trapeznikov: The work we are doing is very important, based on the important agreement signed in Moscow.

Stever: This agreement has triggered a great deal of cooperative interest in many areas.

CLASSIFIED BY Brent Scowcroft
EXEMPT FROM GENERAL DECLASSIFICATION
SCHEDULE OF EXECUTIVE ORDER 11652
EXEMPTION CATEGORY 5(b) (1, 3)
AUTOMATICALLY DECLASSIFIED ON Imp. to det.

BY lma, NARA, DATE 3/22/04

[At 12:12 the press left.]

Trapeznikov: There will be more and more topics of interest to both countries.

The President: While science is not as spectacular as SALT, both are important and greatly affect what we can do in the future.

Trapeznikov: Sometimes the question arises which country will profit more, but in reality both will benefit.

The President: Cooperation between the intellectuals of both sides will help the whole world.

For example, in the field of medicine, cancer, we are spending a lot of money and hope we will find answers. It doesn't matter who finds it first; it will benefit the whole world. So it is in all these scientific fields.

Trapeznikov: That is right, but much brain power is used for destruction. We must use our brains to bring better life for all people on earth.

We know you want to avoid pollution and we are interested too. As we develop industry, we pollute the environment. We review these questions with Dr. Stever. They are of immense importance.

A well known scientist said "We cannot expect love from nature after what we have done to it." So we have to work to save it, and it is a very important task for our two countries.

Our two countries must play the leading role because we are the most highly advanced. Therefore, we should make our joint work as effective and as practical as possible.

We are starting with basic sciences, but they eventually lead to practical results and that is what we are after. Therefore our cooperation should be not just meetings but practical results of benefit to both.

There was much preparatory work for this meeting, after your visit to Moscow.

Now we are summing up our work and Dr. Stever and I are very pleased with the cooperation.

We would like to firm up the individuals and organizations who will cooperate with each other.

I might ask, is Dr. Stever pleased?

Stever: Yes, very pleased. The best work is in the working groups where we are in close contact. The meeting has been very productive.

The President: This kind of conversation probably could not have taken place a year ago. As Mr. Trapeznikov knows, there have been exchanges, but more atmospheric than substantive. Now after my meeting, we have moved from symbolism to the hard substance. General-Secretary Brezhnev and I share the same feeling. We want results. Not just get to know each other -- though that is good -- but to work for results. It doesn't matter who is first because we will share the results.

This hopefully is what the Moscow summit will be known for in fifty years -- that our two peoples went from getting to know each other to working together.

Dobrynin: On behalf of General-Secretary Brezhnev, I agree, but we will remember it for 100 years. I just came back, there is a feeling in our country going deeper and deeper. These two gentlemen symbolize our cooperation.

The President: I am glad you will see the West. Have you gone there yet?

Stever: They will go first to Los Angeles, then Salinas, and Chicago, etc.

The President: That is a good trip.

Stever: We are amazed at the number of industries who want to get on our schedule. We can't accommodate them all.

[Mr. Trapeznikov and Dr. Stever departed at 12:33 p.m. Ambassador Dobrynin mentioned that a new version of the nuclear treaty was coming, along with ideas for the summit meeting agenda.]

Trappzunker Wty 20 March

P Sent of ~~Wm~~ Pres / Academician Trappzunker
Beg set then 12:00 Noon, Sun., 20 Mar 73
D set then

P Sorry to hear of Kissin

T He solved operation, getting better

P Give him my regards

T He sends best wishes

S There have great jobs in taking on as chairman
We have such agreement in 6 areas?

T Work out one thing is very important, based on
a very start agreement signed in Moscow

S This agreement has triggered a great deal of ~~interest~~ ^{interest in many areas}

12:12 Pasa left

T There ~~are~~ will be more & more types of interest
to both countries

P While science is not as spectacular as S&AT,
both are important & greatly affect what we
can do in a future.

T Sometimes question arises which country will
profit more, but both will benefit.

P Cooperation between a intellectual of both sides
will help a whole world

For example, in field of medicine, cancer, and
are spending a lot of money & hope will find
answers. Doesn't matter who finds it first,
it will benefit a whole world. So it is in all
class scientific fields.

T That is right, but ^{brain} much brain power used for
distinction, we must use our brains to
bring better life for all people etc.

Q & know you ~~are~~ want to ~~improve~~ avoid pollution
& we are interested too. As our ~~change~~ industry
we pollute environment. We ~~understand~~ these
question w/ Dr Storer. They are of immense
importance.

Well ~~behave~~ scientist said "We cannot
expect ~~good~~ from nature after what we have
done to it." So we have to work to ~~save~~ it,
& it is very important task for our 2 countries.

Our 2 countries must play leading role because
~~we~~ we are highly advanced. ∴ we
should make our joint work as effective
and as practical as possible.

We are starting w/ basic theories, but they
essentially lead to practical results & that is
what we are after. ∴ Our cooperation should
be not just intgs but practical results of
benefit to both.

Much preparatory work for this intg, after your
visit to Moscow

Now we are ~~summing~~ ~~up~~ our work & S & I are
very pleased w/ cooperation
we would like to form a ~~small~~ & ~~regular~~
who will cooperate w/ each other
Q: Is Dr S pleased?

S Yes, very pleased. Best work is in working groups
where we are in close contact. Intg has
been very productive.

P This kind of conversation probably could not have taken place a year ago. As I know, there have been exchanges, but more atmospheric than substantive. Now after my visit, we have moved from symbolism to a hard substance. Biz + I share some feeling - we want results. Not just get to know each other - that's good - but to work for results. doesn't matter who is first because we will share results.

There hopefully is what business summit will be known for in 50 years - that over 2 people went from getting to know each other to working together.

D - On behalf of Biz, I agree, but we will remember it 100 yrs. I just can't look, there is a feeling in our country going deeper & deeper. These 2 gentlemen symbolize our cooperation.

P Glad you will see the west. How you gave there yet?

S They will go first to LA, then Salinas, Umeys, etc.

P That is a good trip.

S We are amazed a # of industries who want to get on our schedule. Can't accommodate all.
