RE
Dear Mr. President - aw hell - Dear Jerry -

Thirty seven years ago you were centering footballs in pre practice punting sessions for Dave Colwell and myself.

Your profile from aft, at that time, assured us of a dependable pass coming from a strong, sound, stable base. The years don't change a thing except that we now encounter the same characteristics via T.V. from the bow angle.

May the good Lord continue to provide you with the wisdom and muscle necessary so that the hopes and aspirations of us average citizens can continue to count on that same good pass from center.

Very truly yours
John A. Miller
